Construction Technology 1: House Construction offers a highly accessible introduction to the key stages of domestic house construction from planning to internal finishes. Its student-friendly layout uses detailed figures, photos and case studies from real-life building sites to aid a practical understanding of construction techniques, providing clear step-by-step guidance in learning the basic principles of low-rise residential construction. This textbook is a vital resource for students in construction, property and architecture, BSc and MSc, including any student taking courses in building surveying, quantity surveying, real estate and construction management, as well as those studying at the HNC/HND level.

Construction Technology 1: House Construction is a widely used and popular textbook designed specifically to support the study of domestic house construction at undergraduate degree and HNC/HND level. This third edition has been thoroughly revised to reflect new technology and construction methods. Its student-friendly layout and features take you through each step of the building process from planning to internal finishes. Construction Technology 1: House Construction • has a clear and accessible text structure for ease of use, with each chapter including definitions of key terms, review tasks and reflective summaries • features a wealth of case studies drawn from real-life building sites • includes comparative studies that allow critical evaluation of different build details or design solutions • includes an entirely new chapter on sustainable construction • uses an enhanced page layout, with improved figures and new photos, including a new plate section of colour photos A companion website featuring photographs and outline answers to the review tasks can be found at: [www.palgrave.com/engineering/riley1](http://www.palgrave.com/engineering/riley1)

Construction Technology 2: Industrial and Commercial Building is a widely used and popular textbook designed specifically to support the study of industrial and commercial building technology at undergraduate degree and HNC/HND level. This second edition has been thoroughly revised to reflect new technology and construction methods. Key features include: • Clear and accessible text structure for ease of use • Unique pedagogical features including comparative studies, case studies and review tasks • New material on sustainability, including green and intelligent buildings • Updated for new building regulations • Enhanced page layout, with improved figures and new photos A companion website featuring extra photographs and other additional material can be found at: [www.palgrave.com/science/engineering/riley2](http://www.palgrave.com/science/engineering/riley2) This volume builds on the subject matter introduced in Construction Technology 1: House Construction, but is also valuable as a standalone text. Mike Riley is Director and Alison Cotgrave is Deputy Director of the School of the Built Environment, Liverpool John Moores University, UK. Both have extensive experience of teaching Construction Technology at undergraduate and postgraduate level.

This work provides a single text to support the learning process associated with the study of the construction of domestic housing. The text includes a series of learning sessions or modules covering individual components of the topic.

This title covers the technology of refurbishment in both housing and large-span multi-storey commercial and industrial buildings.

Designed in a structured, directed format to help develop understanding, rather than just providing a simple source of information, this text focuses on the environmental impact of refurbishment rather than new build. Key features: • Student-centred learning style • Illustrated case studies and review tasks • Focus on the importance of sustainability in refurbishment and building use • Updated to reflect current issues such as flood damage • Covers refurbishment in both housing and large-span multi-storey commercial and industrial buildings • Easy-to-follow page layout, with a wealth of figures and photos A companion website featuring extra photographs and other additional material can be found at: [www.palgrave.com/science/engineering/riley3](http://www.palgrave.com/science/engineering/riley3) This volume builds on material introduced in Construction Technology 1: House Construction and Construction Technology 2: Industrial and Commercial Building, but is also valuable as a standalone text.

The leading guide to professional home construction—now updated and revised! Fundamentals of Residential Construction, Third Edition features the most up-to-date explanations of today's residential construction systems. From foundation to roof and exterior finishes to interior details, this new edition thoroughly addresses the latest developments in materials and methods of house construction, including energy efficiency, framing, and roofing. Abundantly illustrated with more than 1,250 drawings and photographs, including new photorealistic illustrations that bring the text to life, this Third Edition provides authoritative coverage on wood light-frame construction, industrialized systems of construction, insulating concrete forms, light-gauge steel frame, panelized construction, and a new chapter on multifamily construction. Topics covered include: Plumbing Building codes Heating and cooling Financing Wiring Roofing Thermal insulation Environmental concerns Foundations Finish sitework Rough sitework Wood and light-gauge steel framing Engineered materials Exterior and interior finishes Organized in a logical, easy-to-follow format, Fundamentals of Residential Construction, Third Edition is the one-stop source for building professionals to gain a working knowledge of codes, management procedures, material, and all home building concerns.

Tired of new software that doesn't seem to work in the field? Ready to get your teams up to speed and productive with the latest tools? The Construction Technology Handbook takes a ground up, no jargon look at technology in the construction industry. From clear, quickly grasped explanations of how popular software actually works to how companies both large and small can efficiently try out and onboard new tools, this book unlocks new ways for construction field teams, firm owners, managers, leaders, and employees to do business. You'll learn about: Simple frameworks for making sense of all the new options cropping up How software and data work and how they work together to make your job easier and safer What artificial intelligence really is and how it can help real companies today Tools that are just over the horizon that will, one day, make your job just a little bit easier New and practical resources to help you incorporate an attitude of innovation and technology adoption into your workplace Perfect for general contractors and subcontractors, The Construction Technology Handbook also belongs on the bookshelves of construction technology vendors and construction workers who want to better understand the needs of the construction industry and the inner workings of construction technology, respectively.

\*Construction Technology 1: House Construction is a widely used and popular textbook designed specifically to support the study of domestic house construction at undergraduate degree and HNC/HND level. This second edition has been thoroughly revised to reflect new technology and construction methods.\* -back cover.

Construction and Building Technology introduces students to construction processes and procedures. Students will learn about construction technology, construction materials and management, and project design. They will study building foundations, subsystems, and structures, and learn how these systems are maintained, repaired, or altered. Chapters on commercial, industrial, and engineered construction processes and procedures are also included. The book is correlated to the Standards for Technological Literacy and includes the following chapter features: • Career Connections – address careers related to the chapter material. • STEM Connections and Curricular Connections – relate chapter content to math, science, and social sciences. • Technology Links – highlight current technology that relates to chapter content. • Green Construction – features relate chapter content to environmental issues. • Test Your Knowledge – questions test student understanding of chapter content. In addition to the textbook, the teaching package includes the Tech Lab workbook, Instructor's Resource CD, EXAMVIEWRG Assessment Suite CD, and Instructor's Presentations for PowerPoint CD. Construction and Building Technology Supports STEM: • Design process • Measurement • Science STEM Connection features • Green Construction features • Engineering systems This bundle includes a copy of the Student Text and an Online Text (6-Year Classroom Subscription). Students can instantly access the Online Text with browser-based devices, including iPads, netbooks, PCs, and Mac computers. With G-W Online Textbooks, students easily navigate linked tables of contents, search specific topics, quickly jump to specific pages, enlarge for full-screen reading mode, and print selected pages for offline reading.
