The hidden Agenda of Modernity breaks down the traditional account of the concept; by applying Aristotle's skepticism, the author gets into the inside of the historical phenomena that shaped the most important frameworks of the different waves of modernity. Profound and full of insight, an excellent complement to any study on Modernity.

Amazon.com: Cosmopolis: The Hidden Agenda of Modernity ...

In the seventeenth century, a vision arose which was to captivate the Western imagination for the next three hundred years: the vision of Cosmopolis, a society as rationally ordered as the Newtonian view of nature. While fueling extraordinary advances in all fields of human endeavor, this vision perpetuated a hidden yet persistent agenda: the delusion that human nature and society could be fitted into precise and manageable rational categories.
