The rights of lesbian, gay, bisexual, and transgender persons (LGBT) are strongly contested by certain faith communities, and this confrontation has become increasingly pronounced following the adjudication of a number of legal cases. As the strident arguments of both sides enter a heated political arena, it brings forward the deeply contested question of whether there is any possibility of both communities' contested positions being reconciled under the same law. This volume assembles impactful voices from the faith, LGBT advocacy, legal, and academic communities - from the Human Rights Campaign and ACLU to the National Association of Evangelicals and Catholic and LDS churches. The contributors offer a 360-degree view of culture-war conflicts around faith and sexuality - from Obergefell to Masterpiece Cakeshop - and explore whether communities with such profound differences in belief are able to reach mutually acceptable solutions in order to both live with integrity.

Analyzes six popular children's books to define the genre and explains ways that adult experience and expectations can change the meaning of the text.

In a future where the Population Police enforce the law limiting a family to only two children, Luke, an illegal third child, has lived all his twelve years in isolation and fear on his family's farm in this start to the Shadow Children series from Margaret Peterson Haddix. Luke has never been to school. He's never had a birthday party, or gone to a friend's house for an overnight. In fact, Luke has never had a friend. Luke is one of the shadow children, a third child forbidden by the Population Police. He's lived his entire life in hiding, and now, with a new housing development replacing the woods next to his family's farm, he is no longer even allowed to go outside. Then, one day Luke sees a girl's face in the window of a house where he knows two other children already live. Finally, he's met a shadow child like himself. Jen is willing to risk everything to come out of the shadows—does Luke dare to become involved in her dangerous plan? Can he afford not to?

Revealing the shocking and detailed accounts of how adult women stalk, sexually assault, and even rape adult men, this book portrays an eye-opening reality: women can act as aggressive predators and victimize men. •Details the rape trials of two women as well as other personal accounts and interviews • Utilizes careful analysis of research to determine the extent of this crime by adult women against adult men • Addresses a range of actions in which adult women sexually abuse or assault adult men, and offers advice and counsel to these victims • Provides surprising information that will be of value to law enforcement and corrections practitioners, social workers, business administrators, human resources personnel, academics in the fields of sociology, psychology, gender issues, and criminology, as well as general readers

Given the long-standing belief that children ought to be shielded from disturbing life events, it is surprising to see how many stories for kids involve killing. Bloody Murder is the first full-length critical study of this pervasive theme of murder in children 's literature. Through rereadings of well-known works, such as Alice 's Adventures in Wonderland, the Nancy Drew Mystery Stories, and The Outsiders, Michelle Ann Abate explores how acts of homicide connect these works with an array of previously unforeseen literary, social, political, and cultural issues. Topics range from changes in the America criminal justice system, the rise of forensic science, and shifting attitudes about crime and punishment to changing cultural conceptions about the nature of evil and the different ways that murder has been popularly presented and socially interpreted. Bloody Murder adds to the body of inquiry into America's ongoing fascination with violent crime. Abate argues that when narratives for children are considered along with other representations of homicide in the United States, they not only provide a more accurate portrait of the range, depth, and variety of crime literature, they also alter existing ideas about the meaning of violence, the emotional appeal of fear, and the cultural construction of death and dying.

This volume explores film and television for children and youth. While children 's film and television vary in form and content from country to country, their youth audience, ranging from infants to " screenagers " , is the defining feature of the genre and is written into the DNA of the medium itself. This collection offers a contemporary analysis of film and television designed for this important audience, with particular attention to new directions evident in the late twentieth and early twenty-first centuries. With examples drawn from Iran, China, Korea, India, Israel, Eastern Europe, the Philippines, and France, as well as from the United States and the United Kingdom, contributors address a variety of issues ranging from content to production, distribution, marketing, and the use of film, both as object and medium, in education. Through a diverse consideration of media for young infants up to young adults, this volume reveals the newest trends in children 's film and television and its role as both a source of entertainment and pedagogy.

In Children's Biographies of African American Women: Rhetoric, Public Memory, and Agency Sara C. VanderHaagen examines how these biographies encourage young readers to think about themselves as agents in a public world. Specifically VanderHaagen illustrates how these works use traditional means to serve progressive ends and thereby examines the rhetorical power of biography in shaping identity and promoting public action. Drawing on scholarship in rhetoric, memory studies, and children's literature, VanderHaagen presents rhetorical analyses of biographies of three African American women—poet Phillis Wheatley, activist Sojourner Truth, and educator-turned-politician Shirley Chisholm—published in the United States during the twentieth and twenty-first centuries. VanderHaagen begins by analyzing how biographical sketches in books for black children published during the 1920s represent Wheatley and Truth. The study then shifts to books published between 1949 and 2015. VanderHaagen uses a concept adapted from philosopher Paul Ricoeur—the idea of the "agential spiral"—to chart the ways that biographies have used rhetoric to shape the life stories of Wheatley, Truth, and Chisholm. By bringing a critical, rhetorical perspective to the study of biographies for children, this book advances the understanding of how lives of the past are used persuasively to shape identity and encourage action in the contemporary public world. VanderHaagen contributes to the study of rhetoric and African American children's literature and refocuses the field of memory studies on children's biographies, a significant but often-overlooked genre through which public memories first take shape.
