Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

It includes hundreds of tips, pictures, diagrams and tables that every excavation contractor and supervisor can use This revised edition explains how to handle all types of excavation, grading, paving, pipeline and compaction jobs -- whether it's a highway, subdivision, commercial, or trenching job. This edition has been completely rewritten to cover new materials, equipment and techniques.It includes hundreds of tips, pictures, diagrams and tables.

One of Fuller ' s most popular works, Operating Manual for Spaceship Earth, is a brilliant synthesis of his world view. In this very accessible volume, Fuller investigates the great challenges facing humanity. How will humanity survive? How does automation influence individualization? How can we utilize our resources more effectively to realize our potential to end poverty in this generation? He questions the concept of specialization, calls for a design revolution of innovation, and offers advice on how to guide " spaceship earth " toward a sustainable future. Description by Lars Muller Publishers, courtesy of The Estate of Buckminster Fuller

From 1930 to 1968, General Motors sponsored a 1:12 scale model automobile design competition for youth—the famous Fisher Body Craftsman ' s Guild. Each year thousands of boys and young men from across America competed for scholarships by designing, building, and submitting a scale model of their own " dream car. " to be judged on such qualities as design originality and craftsmanship. A public relations bonanza for GM, the program helped to identify and nurture a generation of future leaders in design engineering, automotive design, automotive styling, industrial design and other endeavors. In these essays, more than 30 Guildsmen chronicle their experiences in the competition, revealing their model car design techniques, tricks, and secrets: Philip J. Rauth, Joseph R. Rauth, Herman I. Rauth, Roger D. Teter, Gordon D. Williams, William A. Keyser, Jr., Warren M. Bakken, Wilfred C. Keagy, Arnold L. Joslin, Raymond P. Wykes, Charles R. Foreman, Adrian A. Bruno, Charles H. Stewart, George E. Anderson, William D. Scott, Walter F. O ' Neill, Jr., Thomas L. De Fazio, Felix R. Collazo, Ronald J. Will, Roger L. Schneider, Thomas L. Covert, Paul F. Bonfilio, George G. Herzog, Samuel T. Kjellman, Frederick J. " Bud " Magaldi, Geza A. Loczi, Jeffrey A. Jones, Robert W. Lawhn, Tom W. Graboski, Terry P. Graboski, Spencer L. Mackay, Grant Onnie, John L. Jacobus and John M. Mellberg.

"After many decades - and even more methodologies - software projects are still failing. Why? Managers see software development as a production line. Companies don't know how to manage software projects and hire good developers. Many developers still behave like factory workers, providing terrible service to their employers and clients. Agile was a big step forward, but not enough. What's missing? The right mindset - for both developers and their employers. As developers worldwide are recognizing, the right mindset is craftsmanship ... Mancuso explains what craftsmanship means to the developer and his or her organization, and shows how to live it every day in your real-world development environment. Mancuso shows how software craftsmanship fits with and helps you improve upon best-practice technical disciplines such as agile and lean, taking all your development projects to the next level. You'll learn how to change the disastrous perception that software developers are the same as factory workers, and that software projects can be run like factories. By placing greater professionalism, technical excellence, and customer satisfaction at the heart of what you do, you won't just deliver more value to everyone involved: you'll be happier and more fulfilled doing it"--Publisher's description.
