The third book in the New York Times and USA Today bestselling The Wedding Pact series. Libby St. Clair believes in fate-so much so, she's willing to pin everything on a curse a fortune teller placed on her and her two best friends when they were kids. The curse, that each of them will marry before thirty, have a disaster of a wedding, and end up with a man other than her original fiance, has come to fruition for both of her friends, who are now deliriously happy. But Libby's attempt to quick-start the curse by proposing to her wrong-for-her boyfriend ends in a wild dash from the altar. She's rescued by her friend Noah, the only person who understands her impulsive decisions--because he's the same way. Having spent most of his adulthood fleeing responsibility and commitment, Noah McMillan is finally ready to grow up. Of course, figuring out how is still a work in progress. When he realizes he's in love with Libby, he flies to Kansas City to put a stop to her wedding. But Libby's already pulled a runaway bride. Eager to cheer her up and prove that he can be the man she deserves, he takes her on a madcap car trip that will bring them all the way to the City of Sin. In Vegas, those who risk it all either win big or lose everything, so what will happen if Libby and Noah take a gamble on love? The Wedding Pact Series: #1 The Substitute (Megan) #2 The Player (Blair) #3 The Gambler (Libby)'

Easier and Cheaper to Set Up Than Raised Beds! For homeowners young and old looking for the easiest and most affordable way to grow the most vegetables, the Raised Row method shared in this breakthrough book is the new go-to choice. In the past decade, raised bed gardening has been wildly popular, but it requires buying wood or another material to build the raised beds, which quickly becomes expensive and labor intense. A raised row garden uses just soil and mulch, such as shredded leaves, to create raised growing rows and walking rows. This method is more budget-friendly, natural and just as effective to control weeds and see an impressive harvest your first year. Jim and Mary Competti, founders of the blog Old World Garden Farms, are the leaders of this gardening revolution. They ' ve perfected and streamlined their method over several years. They spend only a few minutes per day maintaining a large garden that provides their family with food for the whole year. In this book, they share their secrets so anyone can do it too. Raised rows utilize straw mulch, compost and cover crops to enrich the soil you have and keep down weeds naturally. This way, no backbreaking overturning of the beds is required, as it is for traditional row gardening. Now, readers can work less and enjoy the fruits of their gardens more!

The Small Gas Engines Workbook includes a variety of questions, in various formats, to help reinforce the student's understanding of the material presented in the textbook chapters. Step-by-step jobs in the Workbook guide the students through important engine service procedures. The Workbook also includes sample Equipment & Engine Training Council (EETC) technician certification tests for the four-stroke and two-stroke areas of certification. These tests help the students prepare for EETC certification.
