in the global comparative discussion that continue to shed light on COVID-19 and shape debates about what it means for scholarship in health and comparative politics. Editors Scott L. Greer, Elizabeth J. King, Elize Massard da Fonseca, and André Peralta-Santos bring together over 30 authors versed in politics and the health issues in order to understand the health policy decisions, the public health interventions, the social policy decisions, their interactions, and the reasons. The book's coverage is global, with a wide range of key and exemplary countries, and contains a mixture of comparative, thematic, and templated country studies. All go beyond reporting and monitoring to develop explanations that draw on the authors' expertise while engaging in structured conversations across the book.

Coping with the Future: Theories and Practices of Divination in East Asia offers contributions to various practical and theoretical aspects of divination from antiquity to the present in East Asia.

The Origins of Buddhist Monastic Codes in China contains the first complete translation of China's earliest and most influential monastic code. The twelfth-century text *Chanyuan qinggui* (Rules of Purity for the Chan Monastery) provides a wealth of detail on all aspects of life in public Buddhist monasteries during the Sung (960-1279). Part One consists of Yifa's overview of the development of monastic regulations in Chinese Buddhist history, a biography of the text's author, and an analysis of the social and cultural context of premodern Chinese Buddhist monasticism. Of particular importance are the interconnections made between Chan traditions and the dual heritages of Chinese culture and Indian Buddhist Vinaya. Although much of the text's source material is traced directly to the Vinayas and the works of the Vinaya advocate Daoan (312-385) and the Lü master Daoxuan (596-667), the *Chanyuan qinggui* includes elements foreign to the original Vinaya texts—elements incorporated from Chinese governmental policies and traditional Chinese etiquette. Following the translator's overview is a complete translation of the text, extensively annotated.

In the sciences, the merits and ramifications of open access and the electronic publishing model that gives readers free, irrevocable, worldwide, and perpetual access to research have been vigorously debated. Open access is now increasingly proposed as a valid means of both disseminating knowledge and career advancement. In *Digitize This Book!* Gary Hall presents a timely and ambitious polemic on the potential that open access publishing has to transform both a paper-centric humanities scholarship and the institution of the university itself.

Digitizing Made Easy is for every embroidery machine user and commercial machine embroiderer looking to better understand and utilize digitizing software. The author's time-tested method, demonstrated in 250 step-by-step color photos will help you to better identify the tools of modern digitizing, and the best processes with

which to use them. With chapters covering artwork, auto-digitizing, stitch types, mapping and sequencing, underlay and blending, readers will quickly develop a solid foundation with which to explore the endless possibilities of digitizing.

Traversing visible and invisible realms, *A Time of Lost Gods* attends to profound rereadings of politics, religion, and madness in the cosmic accounts of spirit mediumship. Drawing on research across a temple, a psychiatric unit, and the home altars of spirit mediums in a rural county of China's Central Plain, it asks: What ghostly forms emerge after the death of Mao and the so-called end of history? The story of religion in China since the market reforms of the late 1970s is often told through its destruction under Mao and relative flourishing thereafter. Here, those who engage in mediumship offer a different history of the present. They approach Mao's reign not simply as an earthly secular rule, but an exceptional interval of divine sovereignty, after which the cosmos collapsed into chaos. Caught between a fading era and an ever-receding horizon, those "left behind" by labor outmigration refigure the evacuated hometown as an ethical-spiritual center to come, amidst a proliferation of madness-inducing spirits. Following pronouncements of China's rise, and in the wake of what Chinese intellectuals termed semicolonialism, the stories here tell of spirit mediums, patients, and psychiatrists caught in a shared dilemma, in a time when gods have lost their way.

This volume explores China's cultural heritage ideology and policies from three interrelated perspectives: the State and World Heritage tourism; cultural heritage tourism at undesignated sites, and the cultural politics of museums and collections. Something of a cultural heritage designation craze is happening in China. This is new within even the last five to ten years. Officials at many levels now see

Download Ebook Dahao Parts Manual

heritage preservation as a means for commoditizing their regions. They are devoting new resources and attention to national and international heritage designations. Thus, addressing cultural heritage politics in a nation dedicated to designation is an important project, particularly in the context of a rapidly growing economy. This volume is also important because it addresses a very wide range of cultural heritage, providing an excellent sample of case studies: historic vernacular urban environments, ethnic tourism, scenic tourism, pilgrimage as tourism, tourism and economic development, museums, border heritage, underwater remains, and the actual governance and management of the sites. This volume is an outstanding introduction to cultural heritage issues in China while contributing to Chinese studies for those with greater knowledge of the area.

A fresh and funny twist on Snow White from the author of *Cindy Ella and Geek Charming!* The ideal L.A. fairy tale for fans of *Once Upon a Time* and *L.A. Candy* Simone never saw herself as the "cute girl"—she was always the chunky smartmouth. But after a year of avoiding her wicked almost-stepmonster through Zumba class, Simone's now sporting a whole new retro style. And people keep acting oddly. One thing: her stepmonster seems to be trying to accidentally kill her, or at least fatten her back up. And so when Simone's brother offers to let her move in with him and his six roommates for the summer, Simone jumps at the chance for some normalcy. Only living with seven very different college boys isn't exactly going to help her land her very own happily ever after . . .

Every year, at the Wa Huang Gong temple in Hebei Province, China, people gather to worship the great mother, Nuwa, the oldest deity in Chinese myth, praising her for bringing them a happy life. It is a vivid demonstration of both the ancient reach and the continuing relevance of mythology in the lives of the Chinese people. Compiled from ancient and scattered texts and based on groundbreaking new research, *Handbook of Chinese Mythology* is the most comprehensive English-language work on the subject ever written from an exclusively Chinese perspective. This work focuses on the Han Chinese people but ranges across the full spectrum of ancient and modern China, showing how key myths endured and evolved over time. A quick reference section covers all major deities, spirits, and demigods, as well as important places (Kunlun Mountain), mythical animals and plants (the crow with three feet; Fusang tree), and related items (Xirang—a kind of mythical soil; Bu Si Yao—mythical medicine for long life). No other work captures so well what Chinese mythology means to the people who lived and continue to live their lives by it. With more than 40 illustrations and photographs, fresh translations of primary sources, and insight based on the authors' own field research, *Handbook of Chinese Mythology* offers an illuminating account of a fascinating corner of the world of myth.
