Things You'll Need 1 cup warm water Mixing bowl 1/4 cup liquid soap Spoon Paper towel

How to Make Your Own Decal Setting Solution | Our Pastimes
Like Don S said, decal setting solution and decal softening solution are two different things. I use setting solution (Microsol product with a blue label) under the decal to prevent silvering, and softening solution (the Microsol product with the red label) on the top to soften the decal so it will conform to the surface.

Homemade Decal Solvent - FineScale Modeler - Essential ...
2. The best setting solution is a couple of ounces of very warm water with one drop of dish detergent. This breaks the surface tension of the water. Decals slide onto it easily and then you can move them into place. And the behavior of the detergent helps pull the decal down into place.

Waterslide decal tips and tricks - The Silicon Underground
I just added some to my 'soaking water' while removing the decal from its backing. It worked well for me with inkjet, so laser must be fine too! I mix about 2-3 caps of the white vinegar into a margarine dish sized container of warm water, then soak the decal til it comes off (1 to 2 mins on average).

DIY decal softener!
I read somewhere, I think it was on this forum, that the strongest setting solution you can use is plain vinegar. It is reported to make decals melt better than any of the brand-name solutions. If you want to try it, I'd use some scrap decals and dilute it with some water and see how things work.

Homemade decal set?? - FineScale Modeler - Essential ...
I Suggest using luke warm water as hot water activates the paper too quickly and can make the decals hard to handle. I prefer using Walthers Solvaset for a setting solution although any commercial decal set will work. Because of the characteristics of the ink itself it will not shrink down over details as well as Silk Screened decals.

Decal solvents - What's the best, and why?
Other wise applying a water slide normally then, after drying, applying micro sol or mark softer will soften the decal the same. You could probably use 50/50 white vinegar and water as a substitute for micro set if you'd like, but I feel like micro sol or mark softer are the more important component. level 2.

Alternatives to decal setter and softer? : Gunpla
