This text describes the functions that the BIOS controls and how these relate to the hardware in a PC. It covers the CMOS and chipset set-up options found in most common modern BIOSs. It also features tables listing error codes needed to troubleshoot problems caused by the BIOS.

From the Vegas Strip to Wall Street boardrooms and Federal courts, modern corporate titans collide in this explosive true story of how private equity firm Apollo Global Management's thirty-billion-dollar buyout of Caesars Entertainment turned into unprecedented bankruptcy of the gaming empire. In the bestselling tradition of Michael Lewis's The Big Short and Ben Mezrich's Bringing Down the House, journalists Max Frumes and Suijet Indap deliver a page-turning account of the spectacular 2015 bankruptcy of America's biggest gaming empire, Caesars Entertainment. Backdropping this thriller-esque narrative are the jokers, kings, and called bluffs at the center of the modern distressed-debt-investing world. Distressed-debt investing, dubbed "vulture investing" in its infancy, is the buying of debt of struggling corporations, institutions, and even cities or countries—and making a windfall profit on a turnaround. In covering the extraordinary Caesars case, The Caesars Palace Coup presents a riches-to-rags adventure unlike any other as it appraises the battling billionaires who held the cards in 2008's leveraged buyout. This wild coup's scope spans courtrooms, levels of government, academic halls, and ultimately involves an entire corrupt system of liar's poker. Readers will discover just how neatly sophisticated—and underhanded—the high-stakes finance battleground has become. Authors Frumes and Indap, experienced business journalists, illuminate the major players and businesspeople at the tipping points of almost every major vulture's turnaround in recent history. The Caesars Palace Coup reveals the cut-throat, multilevel competition enacted by powerful investors used to getting their own way. And goes one step further to consider the devastating, true impact of the upheaval wrought by their actions. It's a treacherous game. Roll the dice.

The Ruffhouse Records founder tells how he overcame poverty, abuse, and addiction to start a label that launched some of music's biggest stars: "Gripping"—Philadelphia Magazine As a struggling musician trying to catch a break in 1960s Philadelphia, Chris Schwartz navigated the crime-infested, morally bankrupt music industry to found and build one of the most successful hip-hop record labels in the world. That label was Ruffhouse, which launched the careers of Nas, The Fugees, Cypress Hill, and others, dominating the charts and generating global revenues of over a billion dollars. Schwartz and his partner, Joe Nicolo, built Ruffhouse from one desk and a phone to one of hip-hop's most revered record companies while simultaneously struggling with drug addiction and alcoholism. A story of money, greed, envy, betrayal, violence, addiction, loss, and redemption, not to mention a whole lot of music, Ruffhouse reveals the inside story of the record companies, recording studios, tour buses, private jets, mansions, radio stations, and concert halls at the height of hip-hop's 1990s heyday while also uncovering the darker side of the business, from police stations to rehab clinics, courtrooms to prisons. Told in Schwartz's own candid, searing prose, Ruffhouse is a portrayal of hip-hop culture at its tipping point, as it transitioned from urban curiosity to global phenomenon. "[A] story of adversity and perseverance...Fans of these artists will love the insider information on the recording process and the trials and tribulations of getting this music out into the world."Library Journal "All respect to Chris Schwartz. He is a great visionary."—Nas

This practical resource shows teachers how to enact robust forms of civic education in today's schools. Both instructive and thought-provoking, it will inspire teachers to craft curricula addressing a wide range of genuine civic problems such as those related to racial discrimination, environmental damage, and community health. Dividing civic literacy projects into three key phases—problem identification, problem exploration, and action—the author provides concrete examples from upper-elementary, middle, and high school classrooms to illustrate and analyze how each phase can unfold. The projects ultimately provide opportunities for youth to participate in civic life while they develop essential literacy skills associated with reading, writing, and speaking. The final chapter outlines a curriculum design process that will result in coherent and meaningful civic literacy projects driven by clear goals. It includes practical tools, such as a sample unit timeline, an assessment chart, and student worksheets that can be modified for immediate use.

Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

Book 1 of the Desert Roses series. Working as a Harvey Girl at the luxury resort of El Tovar, located on the south rim of the Grand Canyon, Alexandra Keegan feels she is in a dream come true. But when her father's indiscretions come to light and her mother is suspected of murder, Alex finds herself the center of some unwelcome attention. Will she soon find herself alone in the world?

Stereolithography: Materials, Processes and Applications will focus on recent advances in stereolithography covering aspects related to the most recent advances in the field, in terms of fabrication processes (two-photon polymerization, micro-stereolithography, infrared stereolithography and stereo-thermal-lithography), materials (novel resins, hydrogels for medical applications and highly reinforced resins with ceramics and metals), computer simulation and applications.

PIC Microcontrollers are a favorite in industry and with hobbyists. These microcontrollers are versatile, simple, and low cost making them perfect for many different applications. The 8-bit PIC is widely used in consumer electronic goods, office automation, and personal projects. Author, Dagan Ibrahim, author of several PIC books has now written a book using the PIC18 family of microcontrollers to create projects with SD cards. This book is ideal for those practicing engineers, advanced students, and PIC enthusiasts that want to incorporate SD Cards into their devices. SD cards are cheap, fast, and small, used in many MP3 players, digital and video cameras, and perfect for microcontroller applications. Complete with Microchip's C18 student compiler and using the C language this book brings the reader up to speed on the PIC 18 and SD cards, knowledge which can then be harnessed for hands-on work with the eighteen projects included within. Two great technologies are brought together in this one practical, real-world, hands-on cookbook perfect for a wide range of PIC fans. Eighteen fully worked SD projects in the C programming language Details memory cards usage with the PIC18 family
