There are traditional as well as modern career streams. Hence, readers have a good variety to choose from. A note on career counselling must be read by all career aspirants. They must choose a career according to their interest, financial position, the ability to work hard and modern trends. This book is very well researched. It can be beneficial to the youth of all age groups. Even senior executives, who want to explore new avenues, can read it and join new career streams to their professional and financial growth.

Guide to Petroleum Engineering Career By: Engr. Azunna I. B. Ekejiuba (Ph.D.) Historically, human beings have used petroleum in one form or another since ancient times (more than 8000 years ago). However, the birth of the modern petroleum industry was on August 27, 1859, when Colonel Edwin L. Drake used the then popular cable tool (also called churn or percussion) drilling method to drill the actual historically first oil well, on a stream called Oil Creek, near Titusville, Pennsylvania, at a depth of 69 feet, six inches (21 metres). In recent years, the advent of the transcontinental transmission lines and petrochemical industries has increased the value of natural gas (methane) to a fuel in great demand and a chemical feedstock (raw material) for many modern commercial and industrial products, particularly the synthesis of plastics, rubber, fertilizers, solvents, adhesives, pesticides, gas-to-methanol (GTM), liquefied natural gas (LNG), et cetera. Guide to Petroleum Engineering Career is an ideal career guide, lecture note,

practical manual, petrochemical production guide, information source (to all categories of practicing petroleum industry workers and enthusiasts who are interested to know more about the current key mankind energy resources), as well as a reference on the emerging renewable fuel economy which reflects the challenges faced by the millennium petroleum engineers.

Retold Stories (Autobiography of a field Geologist) is authored by a geologist, who has seen 80 springs in his life. Written in a simple and lucid manner, it is not only an autobiography but also a collection of interesting events, not necessarily in the order that they happened in. One of them is related to the author's Man Friday in the field Singheshwar Mahato, an unassuming gentleman. Recollections narrated about his activities are hilarious as well as amusing. While travelling through the length and breadth of India, the author has met a bizarre assortment of characters, about whom he has added many episodes to the book, which make its reading pleasurable.

Upspeeding technological evolution and globalisation characterise today's and future lives of engineers. It is vital for all institutions involved in engineering education to keep pace and to anticipate future needs. The herein presented collection of papers results from the Workshop on Global Engineering Education (GEE ' 3) which took place at Aachen University of Technology, 18 – 20 October 2000. In this meeting more than 150 specialists from 25 countries discussed the topic “ Educating the Engineer for the Century ” . Which role to attribute to non-technical qualifications? How to integrate ethical aspects in

education? Do we have to define international standards in education? What about quality control? What is the potential of new media for knowledge transfer? How to organise lifelong learning for engineers? - These are some of the questions discussed among representatives of industries, educational institutions, politicians and individuals during this meeting. According to the sessions of the workshop, the book is subdivided into chapters covering the areas “ Role of the Global Engineer in Meeting the Challenges of Society in the Century ” , ” Internationality and Interdisciplinarity ” , “ Engineering Education in Emerging Economies ” , “ European Bachelor and Master Programmes ” , “ Developing Personal Skills to be a Global Engineer ” . Three chapters deal with successful practice in engineering education covering the topics “ Programmes, Curricula and Evaluation ” , “ Educational Concepts ” , and “ University-Industry Partnership, Design Projects ” .
