Select the right gear while keeping your clutch lever pulled in then put your left foot back down on the ground so that you have two feet on the ground for best balance. Use the front brake to hold the bike in place - this is usually sufficient unless it's a really steep hill, in which case you'll take your foot off the ground to operate the rear brake.

Driving on Steep and Icy Hills: How To and Tips (w/ Pictures)

When driving a car with an automatic transmission, you always put the car in “park” when you’re not driving it. However, in a manual transmission car, putting in first gear (or reverse when then the car is facing downhill) is just like putting the car in “park.” It’s a typical habit to leave the car in neutral and use the emergency brake.

5 Habits to Break When Driving a Manual Transmission

Online Library Driving Downhill Manual Transmission

A manual transmission requires the driver to operate the gear stick and clutch in order to change gears (unlike an automatic transmission or semi-automatic transmission, where one (typically the clutch) or both of these functions are automated). Most manual transmissions for cars allow the driver to select any gear ratio at any time, for example shifting from 2nd to 4th gear, or 5th to 3rd gear.
