Definition: Garage means a building, shed, or enclosure, or any part of a building, shed, or enclosure, that can accommodate, store, or keep five or more motor vehicles for a fee or other ...

A highly illustrated reference tool, this handbook provides comparative visual analysis of major urban extensions and masterplans around the world. It places an important new emphasis on the processes and structures that influence urban form, highlighting the significant impact that public or private land ownership, management and funding might have on shaping a particular

project. Each of the book's 20 subjects is rigorously analysed through original diagrams, scale drawings and descriptive texts, which are complemented by key statistics and colour photography. The case studies are presented in order of size rather than date or geographical location. This offers design professionals, developers and city planners, as well as students of architecture and urban design informed organisational and formal comparisons, leading to intriguing insights. A wide geographical range of contemporary and historic masterplans are featured. These encompass European projects from the 19th century to the present day: Belgravia in London, Sarphatipark in Amsterdam, Potsdamer Platz in Berlin, La Défense Seine Arche in Paris and Hammarby Sjöstad in Stockholm. In North America, the postwar development of Stuyvesant Town in Manhattan is also the subject of a case study. More recent and ongoing international urban schemes are included, such as Puerto Madero in Buenos Aires, Downtown Dubai and the New Central Business District in Beijing.

This book provides an inventory of water resources, describes water challenges, and suggests methodologies and technologies for integrated water resources management in the UAE. It also summarizes efforts of water conservation and management, and modern approaches for improvement of water resources management and decision-making related to this valuable resource. The authors are specialized in geology and hydrogeology and have been teaching and conducting scientific research on water resources in the UAE for the last three decades. This book represents the main reference on water resources in the UAE for academia, researchers, professionals, students and the general public.

"The book is an authoritative guide to construction law in the United Arab Emirates and the Gulf"--

My Journey with the United Nations and Quest for the Horn of Africa's Unity and Justice for Ethiopia by Kidane Alemayehu My Journey with the United Nations and Quest for the Horn of Africa's Unity and Justice for Ethiopia is a landmark in the annals of Ethiopian literature and history. It gives a huge assignment to the present and future generations of Ethiopians – namely that justice must be done, if not today, then tomorrow, and if not tomorrow, then the day after tomorrow. The Catholic Church, as the Universal Church, cannot remain mum in the face of such horrendous accusations supported by evidence. It is our fervent hope that, as Vicar of Jesus His Holiness, Pope Francis, who is already well known for his humility and steadfast stand for justice, will address this outstanding issue of apology to the Ethiopian people.

Sustainability is a topic of great interest today, particularly for the Gulf Cooperation Council (GCC) countries, which have witnessed very rapid economic and demographic growth over the past decade. The observed growth has led to unsustainable consumption patterns of vital resources such as water, energy, and food, highlighting the need for an urgent shift towards green growth and sustainable development strategies. Sustainability in the Gulf covers the region's contemporary development challenges through the lens of the UN's Sustainable Development Goals (SDGs), which place sustainability at the centre of the solution to the current environmental, economic, and social imbalances facing GCC countries. The book presents multiple analyses of Gulf-specific sustainability topics, examining the current status, challenges, and opportunities, as well as identifying key lessons learned. Innovative and practical policy recommendations are provided, as well as new conceptual angles to the evolving academic debates on the post-oil era in the Gulf. Through chapters covering sector-related studies, as well as the socio-economic dimensions of the sustainability paradigm, this volume offers valuable insights into current research efforts made by the GCC states, proposing a way forward based on lessons learned. This is a valuable resource for students, academics, and researchers in the areas of Environmental Studies, Political Economy, and Economics of the GCC states.

FIDIC contracts are the most widely used contracts for international construction around the world and are used in many different jurisdictions, both common law and civil law. For any construction project, the General Conditions of Contract published by FIDIC need to be supplemented by Particular Conditions that specify the specific requirements of that project. The International Application of FIDIC Contracts: A Practical Guide provides readers with detailed guidance and resources for the preparation of the Particular Conditions that will comply with the requirements of the applicable laws that apply to the site where the work is carried out, and for the governing law of the contract, for a number of the jurisdictions in which FIDIC contracts are used. This book is essential reading for construction professionals, lawyers and students of construction law.

Dubai has continued to meet its targets in becoming the global capital of Islamic finance, nearly doubling the number of sukuk (Islamic bonds) listings on its exchanges since 2017. Furthermore, eased policy restrictions to encourage foreign investment and the 2019 budget's continued commitment to infrastructure development ahead of Expo 2020 are expected to continue driving economic activity. As one of the most diversified economies in the region, Dubai continues to present growth opportunities in various sectors including tourism, logistics, manufacturing and education. Although the emirate has benefitted from its proximity to oil and gas fields, Dubai is right at the forefront of the emerging cleaner energy world, and developing and promoting renewable technologies, including solar energy and electric vehicles.

Despite the fact that the Arabic world marks Al-Hijra at the start of Muharram (the first month in the lunar Islamic calendar) and the Chinese community celebrate the "Spring Festival" at the turn of the Chinese lunisolar year in late January/early February, the Gregorian calendar's New Year marks a new beginning for millions of individuals across the globe. The way in which we celebrate this varies from place to place – in parts of South America, the colour of one's clothing is said to symbolize hopes and desires for the year to come (red for love, yellow for wealth), whereas in Spain it is believed that consumption of grapes on the stroke of midnight will bring prosperity over the coming twelve months. The same may be said of wearing polka dots in the Philippines, and burning torches and fireballs are believed to drive out the impurities of the dying year at the Scottish festival Hogmanay. However the underlying principle is the same – it's out with the old and in with the new. Yet some things never change. Like your trusty, innovative and high-quality legal publication, Court Uncourt. Marking the New Year with a new volume, our team of lawyers in UAE and globally at STA promise to continue in our efforts to bring you the latest legal news with our trademark bespoke twist. We wish you a blessed New Year and an enjoyable read.
