An important addition to the literature of cancer by an award-winning scholar and memoirist. Elaborating upon her "Living with Cancer" column in the New York Times, Susan Gubar helps patients, caregivers, and the specialists who seek to serve them. In a book both enlightening and practical, she describes how the activities of reading and writing can right some of cancer's wrongs. To stimulate the writing process, she proposes specific exercises, prompts, and models. In discussions of the diary of Fanny Burney, the stories of Leo Tolstoy and Alice Munro, numerous memoirs, novels, paintings, photographs, and blogs, Gubar shows how readers can learn from art that deepens our comprehension of what it means to live or die with the disease. From a writer whose own memoir, *Memoir of a Debulked Woman: Enduring Ovarian Cancer*, was described by the New York Times Book Review as "moving and instructive...and incredibly brave," this volume opens a path to healing.

As Ford's follow-up to the famous flathead, the Y-block was Ford's first overhead-valve V-8 and it established an impressive high-performance legacy, winning many races in NASCAR and setting records at the Bonneville Salt Flats. This venerable Ford engine, which powers classic Thunderbirds, Crown Victorias, Edsels, and other cars, is enjoying a performance renaissance. Many aftermarket parts, including heads, can turn a sedate Y-block into a powerhouse. The engine earned its name from its deep-skirt block design that looked like a "Y." This stout engine was installed in millions of Ford cars from 1954 to 1962 and Ford trucks from 1952 to 1964. Author and Ford tech expert Charles Morris explains each critical aspect of rebuilding a stock 239-, 256-, 272-, 292-, and 312-ci Y-block and building a modified Y-block. He shows you how to identify components and conduct a thorough inspection so you select a sound block, heads, intake, and other components. He explains the specifics for obtaining high-quality machining work and verifying clearances. In addition, he delves into the intricacies of each step of the assembly process so you can rebuild a strong-running and reliable engine. Most important, Morris details the steps to effectively remedy the Y-block oiling problems. This is the book Ford Y-block owners and fans have been waiting for. It's an indispensable guide for performing a professional-caliber rebuild and buildup of the Y-block.

In this unique blend of self-help and moral philosophy, perfect for fans of Gretchen Rubin's *The Happiness Project* or Dan Harris' *10% Happier*, talk-radio host Dennis Prager shows us that happiness isn't just a value—it's a moral obligation. When you ask people about their most cherished values, "happiness" is always at the top of the list. In this enduring happiness manifesto, Prager examines how happiness not only makes us better people, but has an effect on the lives of everyone around us—providing them with a positive environment in which to thrive and be happy themselves. Achieving that happiness won't be easy, though: to Prager, it requires a continuing process of counting your blessings and giving up any expectations that life is supposed to be wonderful. "Can we decide to be satisfied with what we have?" he asks. "A poor man who can make himself satisfied with his portion will be happier than a wealthy man who does not allow himself to be satisfied." Prager echoes other political commentators in complaining that too many people today see themselves as victims; he submits that the only way to achieve your desires is to take responsibility for your life rather than blaming others. If you're willing to put some thought into achieving a happier outlook, you will find plenty to mull over in *Happiness Is a Serious Problem*.
