Fifty years in the future, scientists race against time to mend a black hole in the Earth's core before it destroys the entire planet within two years

TIME IS RUNNING OUT Decades from now, an artificial black hole has fallen into the Earth's core. As scientists frantically work to prevent the ultimate disaster, they discover that the entire planet could be destroyed within a year. But while they look for an answer, some claim that the only way to save Earth is to let its human inhabitants become extinct: to reset the evolutionary clock and start over. Earth is the Hugo and Locus Award-nominated novel that, with countless accurate predictions, earned David Brin his reputation as a visionary futurologist.

In a future world dominated by a neural-link web where people can tune into live events and revolutions can be instantly sparked, an active alien communication device is discovered in orbit around the Earth, triggering an international upheaval of fear, hope and violence. Reprint.

Brought back to the mortal plane by sorcery, the Norse Gods joined the battlefields of World War II leading to major Nazi victories, but with the war still raging a generation later, the final battle lines are being drawn.

NOW A MAJOR MOTION PICTURE • "A moving experience . . . a powerful cautionary tale."—Whitley Strieber He was a survivor—a wanderer who traded tales for food and shelter in the dark and savage aftermath of a devastating war. Fate touches him one chill winter's day when he borrows the jacket of a long-dead postal worker to protect himself from the cold. The old, worn uniform still has power as a symbol of hope, and with it he begins to weave his greatest tale, of a nation on the road to recovery. This is the story of a lie that became the most powerful kind of truth. A timeless novel as urgently compelling as War Day or Alas, Babylon, David Brin's *The Postman* is the dramatically moving saga of a man who rekindled the spirit of America through the power of a dream, from a modern master of science fiction. "The *Postman* will keep you engrossed until you've finished the last page."—Chicago Tribune

"The Uplift books are as compulsive reading as anything ever published in the genre."—The Encyclopedia of Science Fiction In all the universe, no species has ever reached for the stars without the guidance of a patron—except perhaps mankind. Did some mysterious race begin the uplift of humanity aeons ago? And if so, why did they abandon us? Circling the sun, under the caverns of Mercury, Expedition Sundiver prepares for the most momentous voyage in our history. A journey into the boiling inferno of the sun . . . to seek our destiny in the cosmic order of life. David Brin's Uplift novels are among the most thrilling and extraordinary science fiction ever written. *Sundiver*, *Startide Rising*, and *The Uplift War*—a New York Times bestseller—together make up one of the most beloved sagas of all time. Brin's tales are set in a future universe in which no species can reach sentience without being "uplifted" by a patron race. But the greatest mystery of all remains unsolved. . . . "Superb"—Science Fiction Times

Hugo and Nebula award-winning author David Brin is one of the most eloquent, imaginative voices in science fiction. Now he returns with a new novel rich in texture, universal in theme, monumental in scope—pushing the genre to new heights. Young Maia is fast approaching a turning point in her life. As a half-caste var, she must leave the clan home of her privileged half sisters and seek her fortune in the world. With her twin sister, Leie, she searches the docks of Port Sanger for an apprenticeship aboard the vessels that sail the trade routes of the Stratoin oceans. On her far-reaching, perilous journey of discovery, Maia will endure hardship and hunger, imprisonment and loneliness, bloody battles with pirates and separation from her twin. And along the way, she will meet a traveler who has come an unimaginable distance—and who threatens the delicate

balance of the Stratoin's carefully maintained, perfect society.... Both exciting and insightful, *Glory Season* is a major novel, a transcendent saga of the human spirit.

Prepare for a harrowing ride through the universe by the New York Times–bestselling author of *Startide Rising* and *The Postman*. Book Three in the Uplift Storm Trilogy The peaceful existence of six outcast races on Jijo has ended. Ancient enemies, the Jophur, have discovered them, preparing to subject the refugees to their dark, perverted plans. The Jijoans' only hope is the same ship that accidentally led their foes to the planet. The Earthship *Streaker*, with its crew of uplifted dolphins and a human commander, must somehow lure the Jophur into a chase through space . . . into the unknown. And then into the weird. More than just the fate of Jijo—or that of distant Earth, also suffering a deadly siege—hangs in the balance. Some believe a terrifying prophecy is about to come true, one that involves *Streaker's* trove of artifacts coveted by factions throughout all Five Galaxies. As countless white dwarf stars verge on unexpected explosion, all sentient life in the universe appears to be at risk unless someone can save them. Praise for the Hugo and Nebula Award–winning Uplift Saga “The Uplift books are as compulsive reading as anything ever published in the genre.” –The Encyclopedia of Science Fiction “An extraordinary achievement.” –Poul Anderson, award-winning author of *Tau Zero*, on *Startide Rising* “An exhilarating read that encompasses everything from breathless action to finely drawn moments of quiet intimacy.” –Locus on *The Uplift War* “Tremendously inventive, ambitious work.” –Kirkus Reviews on *Brightness Reef*

A compendium of information about the complex worlds captured in Brin's Nebula and Hugo Award–winning novels about the uplift universe and the various alien races that populate the series.
