Sustainability - 1st Edition

To address the paradox between economic growth and sustainability, we must find a way to balance the two and allow them to coexist. This balance may be possible not only by developing alternative energy sources but mostly by dramatically containing the growth spirals of economy, population and depletion of resources, reducing them to a state of near stasis.

Implementing the new growth agenda must happen in each country at the national and sub-national level and in five key economic systems, namely: Energy, cities, food and land use, water, and industry. These are the areas where we see the greatest potential for growth, as well as the greatest potential to reduce the risks of harmful climate change.
