A lively chronicle of the year that shaped popular music forever! Fifty years ago, friendly rivalry between musicians turned 1965 into the year rock evolved into the premier art form of its time and accelerated the drive for personal freedom throughout the Western world. The Beatles made their first artistic statement with Rubber Soul. Bob Dylan released "Like a Rolling Stone, arguably the greatest song of all time, and went electric at the Newport Folk Festival. The Rolling Stones's "Satisfaction" catapulted the band to world-wide success. New genres such as funk, psychedelia, folk rock, proto-punk, and baroque pop were born. Soul music became a prime force of desegregation as Motown crossed over from the R&B charts to the top of the Billboard Hot 100. Country music reached new heights with Nashville and the Bakersfield sound. Musicians raced to innovate sonically and lyrically against the backdrop of seismic cultural shifts wrought by the Civil Rights Movement, Vietnam, psychedelics, the Pill, long hair for men, and designer Mary Quant's introduction of the miniskirt. In 1965, Andrew Grant Jackson combines fascinating and often surprising personal stories with a panoramic historical narrative.

MicroRNAs are small non-coding RNAs involved in post-transcriptional regulation of gene expression. Thousands of miRNAs have been identified in different organisms including viruses, insects, plants and animals. MiRNAs has emerged as key regulators of important biological processes. The differential expression of miRNAs in various human diseases has made them potential candidates for developing novel therapies and personalized medicines. This book is focused on microRNA let-7, the second miRNA discovered in the year 2000 and one of the most studied miRNA. This book discusses various aspects of miRNA let-7 starting from its discovery, biogenesis, transcriptional and posttranscriptional regulation to its crucial role in various fundamental cellular processes such as development, stem cell maintenance and differentiation, regulation of signalling pathways in cancer, drug resistance and therapeutic potential in different human diseases.

When a bus full of tourists infected with a genetically engineered virus stops in a quiet community, the area threatens to become the epicenter for a worldwide outbreak. Two Vista County deputies race to contain the revived dead, stop the spread of the virus, and combat the chaos and anarchy that ensues.
