It requires the manufacturer to show the actual test result for the steel pipes on sale. According the related standard sampling methods. 3.1 MTC requires the test agency shall be an independent party, mill has no rights to revise the test results.

The differences between EN 10204 3.1 and 3.2 MTC

The EN 10204 Type 3.1 Inspection Certificate are actual test results from the material in the lot from which the steel products have been supplied (formally referred to as "specific testing"). A 3.1 Inspection Certificate is endorsed only by the manufacturers own representative who has to be independent from the manufacturing process, such as the Quality department or a test house manager/supervisor.

What is the Difference Between EN 10204 3.1 and 3.2...

European standard EN 3 specifies requirements for portable fire extinguishers. Compliance with the standard is legally required for the construction of all fire extinguishers in the European Union. The standard has been published in 10 parts: EN 3-1: Portable fire extinguishers. Description, duration of operation, class A and B fire test.

EN 3 - Wikipedia

A 3.1 certificate is issued by an authority which is independent of manufacturing and is validated by the manufacturers authorised inspection representative. It is equivalent to the "old" 3.1.B certificate. This is an inspection certificate according to EN 10204:2004 that declares the 'metallic products' are in compliance with the order requirements and supply test results.

3.1 Material Certificates | Classic Filters

For any metallic materials 3.1 certificates needs to show heat number, required test results, applicable standards etc. In this case for electrodes, they can send you raw material test results for each batch (heat), but if you need after welding condition they need to make sample weld and test it. it is relative what you need it for.

A 3.1 certificate relates to an inspection certificate that is given for products that have been tested in accordance with DIN-EN-10204 (see the links below). For specific information on what information needs to be in the certificate you will need to refer to the standard (second link).

what is 3.1 certificate - ENGINEERING.com

EN 10204 3.1 Certification 3.1 is a certificate issued by the mill which declares that the plates are in compliance with the specification and includes the test results. Test results are validated by the mill's in-house test department which has to be independent of the manufacturing department. EN 10204 3.2 Certification

EN10204 Certification for Steel Plates

3.1 Declaration of compliance with the order type 2.1 Document in which the manufacturer declares that the products supplied are in compliance with the requirements of the order, without inclusion of test results.

Metallic products - Types of inspection documents

3-1-1 is a special telephone number supported in many communities in Canada and the United States. The number provides access to non-emergency municipal services. The number format follows the N11 code for a group of short, special-purpose local numbers as designated in the North American Numbering Plan. The telephone number 3-1-1 creates a central hub for local subscribers to access a variety of city services. It is intended, in part, to divert routine inquiries and non-urgent community concern

Server-side cursors¶. When using QuerySet.iterator(), Django opens a server-side cursor.By default, PostgreSQL assumes that only the first 10% of the results of cursor queries will be fetched. The query planner spends less time planning the query and starts returning results faster, but this could diminish performance if more than 10% of the results are retrieved.
