A VW Golf 1.4 engine will cost less than a Mk4 Golf 1.8t engine. Though they might be the same age, the 1.8t has a larger capacity and is turbocharged. A 'standard' performance engine, such as a PD150 engine, will always cost less than high-performance versions. The Golf R engine and the R32 engines are other high-performance engines.

"Your instruction helped me to set a NEW COURSE RECORD! Being 62, you can only imagine the fanfare and recognition I received by shooting only 1 shot off my age! I appreciate your tips and I use your great system every day!" - Don Forrest

"Rob's COG System stabilized my golf swing instantly resulting in consistent and crisp ball striking. Not only did it help me shoot a 68 in my last competitive round, I use his system every day to help my lesson clients see results fast! Thanks Rob" - Paul Bonenfant, CPGA Golf Professional

"The C.O.G. System helps me break down the game into manageable sections. I used to be so inconsistent in my approach to the game and my scorecard had a lot of doubles & even triples on my worst days. The C.O.G. complete game system had helped me remove those high scoring holes from my scorecard once and for all!" - Steve Bayner, Entertainer - Master

Vying for Pole Position deals with the challenges facing the global car industry today, analyzing Volkswagen and Toyota, with some surprising results. The book provides insights into each car manufacturer's corporate culture, products, production, leadership and technologies, as well as some thoughts on the future of the car. These two opponents vying for pole position could hardly be more different: Toyota, with a focus on manufacturing excellence, is dominant in its home market, the USA and south-east Asia, whereas VW, with its strategy of product excellence, leads in western Europe, Brazil and China. Industrial dominance will be important to them in the future, with both companies needing to master the next steps in product and manufacturing excellence. The race is by no means over, offering a deep insight into the challenges for carmakers moving away

from fossil fueled combustion to alternative energy vehicles for the mass market. Major players are trying to answer the key question: How will the car of the future look? VW and Toyota now need to keep ambitious competitors at bay. Timing is everything: US manufacturers are focused on their own revival; Korean and Chinese players are progressing surprisingly fast. However, it looks like the battle for pole position will likely remain between Toyota and VW. Motoring the Future offers updates on Volkswagen's and Toyota's next generation vehicles, both plotting a new course into the future. In this thoroughly revised edition the book, new facts and material have extended the scope to American manufacturers and to new competitors from the Far East.
