The technology required to make photographic film has been a secret held by a few companies. This book explains, for the first time at this level of detail, how Eastman Kodak Company makes film. Photographic film is one of the most technically sophisticated chemical products that is used in everyday life. Over 200 complex chemical components are coated on to film base in up to 18 unique, precision layers which in total are half the thickness of a human hair. This insider's view explains in simple terms how the operation works. It is a picture book with over 25 diagrams and over 130 photographs of Kodak's production materials and
