Sign the contract...then write the book. The good news is that almost every nonfiction book published is sold by a proposal. In this comprehensive yet accessible guide, you will learn exactly what a proposal is, what it must contain, and how to pull yours together into an informative, persuasive selling package. Already a favorite for thousands of aspiring writers, this book has been revised and updated by Elizabeth Lyon to feature nearly two dozen actual proposals, plus:

- Choosing a topic based on current trends and competing titles
- Drafting the perfect concept statement—daring agents and editors to reject you
- Defining and targeting your readership—then connecting with them
- Preparing a table of contents and chapter summaries
- Submitting exciting and well-written sample chapters
- Writing query letters
- Devising a marketing plan that will excite agents and publishers

Illustrates an integrated process of planning and writing persuasive grant proposals.

This user-friendly guide helps students get started on--and complete--a successful doctoral dissertation proposal by accessibly explaining the process and breaking it down into manageable steps. Steven R. Terrell demonstrates how to write each chapter of the proposal, including the problem statement, purpose statement, and research questions and hypotheses; literature review; and detailed plan for data collection and analysis. Of special utility, end-of-chapter exercises serve as building blocks for developing a full draft of an original proposal. Numerous case study examples are drawn from across the social, behavioral, and health science disciplines. Appendices present an exemplary proposal written three ways to encompass quantitative, qualitative, and mixed-methods designs. User-Friendly Features

- *"Let's Start Writing" exercises leading up to a complete proposal draft.
- *"Do You Understand?" checklists of key terms plus an end-of-book glossary.
- *End-of-chapter quizzes with answers.
- *Case study examples from education, psychology, health sciences, business, and information systems.
- *Sample proposal with three variants of the methods chapter: quantitative, qualitative, and mixed methods.

"Writing Science is built upon the idea that successful science writing tells a story, and it uses that insight to discuss how to write more effectively. The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, and many more who simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice site The Professor is In, she has helped countless Ph.D.'s turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D., including: -When, where, and what to publish -Writing a foolproof grant application -Cultivating references and crafting the perfect CV -Acing the job talk and campus interview -Avoiding the adjunct trap -Making the leap to nonacademic work, when the time is right The Professor Is In addresses all of these issues, and many more.

This step-by-step guide begins by identifying and defining the basics of a dissertation proposal. With careful consideration, they explore proposal functions and parts, show how to build your study's chain of reasoning, and carefully review alternate study designs. Chapters are devoted to qualitative studies (sectioned into case studies, philosophical, and historical investigations); quantitative studies (sectioned into experimental, causal modeling, and meta-analysis studies), and mixed-method studies (sectioned into: sample survey, evaluation, development, and demonstration and action projects). Three extensively annotated proposals of former students provide examples of the guidance offered and illustrate common types of studies.

The Social Organization of Sexuality reports the complete results of the nation's most comprehensive representative survey of sexual practices in the general adult population of the United States. This highly detailed portrait of sex in America and its social context and implications has established a new and original scientific orientation to the study of sexual behavior. "The most comprehensive U.S. sex survey ever." -USA Today "The findings from this survey, the first in decades to provide detailed insights about the sexual behavior of a representative sample of Americans, will have a profound impact on how policy makers tackle a number of pressing health problems." -Alison Bass, The Boston Globe "A fat, sophisticated, and sperm-freezingly serious volume. . . . This book is not in the business of giving us a good time. It is in the business of asking three thousand four hundred and thirty-two other people whether they had a good time, and exactly what they did to make it so good." -Anthony Lane, The New Yorker New York Times Book Review Notable Book of the Year

A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her Manual for Writers continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, A Manual for Writers of Research Papers, Theses, and Dissertations has been fully revised to meet the needs of today's writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of The Chicago Manual of Style. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, A Manual for Writers remains the essential resource for students and their teachers.

In this valuable handbook, writers learn how to market the potential of a book idea and effectively communicate that potential in a proposal that publishers will read.

postgraduate students. Yet there is a good deal of misinformation and a great lack of guidance about what constitutes a good research proposal and what can be done to maximise one's chances of writing a successful research proposal. Denicolo and Becker recognise the importance of developing an effective research proposal for gaining either a place on a research degree programme or funding to support research projects and set out to explore the main factors that that proposal writers need to attend to in developing successful proposals of their own. Developing Research Proposals will help readers to understand the context within which their proposal will be read, what the reviewers are looking for and will be influenced by, while also supporting the development of relevant skills through advice and practical activities. This book: Explores the nature and purpose of different kinds of proposals Focuses on the actual research proposed Discusses how best to carry out and structure the literature review Examines the posing and phrasing of research questions and hypotheses Looks at how methods and methodology should be handled in a proposal Discusses the crucial issues of planning, strategy and timing in developing targeted proposals Denicolo and Becker draw together the key elements in the process of preparing and submitting a proposal and concludes with advice on responding to the results, successful or not, and their relevance to future proposals. The Success in Research series, from Cindy Becker and Pam Denicolo, provides short, authoritative and accessible guides on key areas of professional and research development. Avoiding jargon and cutting to the chase of what you really need to know, these practical and supportive books cover a range of areas from presenting research to achieving impact, and from publishing journal articles to developing proposals. They are essential reading for any student or researcher interested in developing their skills and broadening their professional and methodological knowledge in an academic context.
