Acclaimed neuroscientist Gary Wenk reveals the fascinating impacts of exercise on the brain Decades of research demonstrate that regular modest levels of exercise improve heart and lung function and may relieve joint pain. Regular daily exercise will help your body to regulate blood sugar levels and reduce inflammation, and many of these benefits are a consequence of reducing the amount of body fat you carry around. Your body clearly benefits in many ways from regular exercise. Does your brain benefit as well? Does regular exercise positively affect brain function? Does our thinking become faster because we exercise? Does running a marathon make us smarter? Dr. Gary Wenk's goal is to provide a realistic perspective on what benefits your brain should expect to achieve from exercise. Your Brain on Exercise skillfully blends scholarship with illuminating insights and clarity. Without requiring any specialized knowledge about the brain, Your Brain on Exercise entertainingly illustrates the intersection between brain health, the consequences of exercise, and our need to eat in an entirely new light. An internationally renowned neuroscientist and medical researcher, Dr. Wenk has been educating college and medical students about the brain and lecturing around the world for more than forty years.

Exercising your brain is just as important as working out. If you don't exercise your brain, it will atrophy, at least the part your not using. 'Use it or lose it' is as true of our mental faculties as it is of our physical abilities. Fortunately, most of us do get plenty of stimulation in our daily lives, jobs, leisure activities and relationships. The problem is that our brain stimulation is often not very balanced, and that imbalance can affect your sense of well-being. This book provides exercises for all the major brain functions at several different levels. Inside you will be able to: test your brain fitness level, develop right brain association and creative ability, and improve your logic and numbers skills using left-brain workouts invented by scientists.
