Factoring is a process of splitting the algebraic expressions into factors that can be multiplied. Included here are factoring worksheets to factorize linear expressions, quadratic expressions, monomials, binomials and polynomials using a variety of methods like grouping, synthetic division and box method.

Factoring Polynomials Worksheets

FACTORIZING POLYNOMIALS 1) First determine if a common monomial factor (Greatest Common Factor) exists. Factor trees may be used to find the GCF of difficult numbers. Be aware of opposites: Ex. $(a-b)$ and $(b-a)$ These may become the same by factoring -1 from one of them.
