“Materials Of Construction-I” is intended to be used as a text book for First Semester Diploma in Civil Engineering and is designed for comprehensively covering all topics relevant the subject as per the Syllabus Prescribed by the Board of Technical Education, Karnataka. At the end of each chapter, Points to remember, Fill up the blanks & Descriptive type questions is given. To enhance the utility of book, Multiple Choice Questions are given towards the end of the book along with answers. This should benefit the students preparing for Common Entrance Test. It is hoped that this book will be immense use to teachers and students of Polytechnics. I wish to express my gratitude to MEI Polytechnic, Bangalore for providing me an opportunity to bring out this text book. I am grateful to Sri Nitin S.Shah, M/s Spana Book House (P) Ltd., Bangalore for publishing this book within a reasonable time. I am thankful to M/s Datalink, Bangalore for neatly typing the manuscript of this book. I also express my sincere thanks to Sri

C.Chandrashekar, HOD (Civil) and colleagues for their encouragement. The readers are welcome to send their valuable comments and suggestions for further improvement of this book.

This book traces the development of higher education in Canada, through a detailed description and analysis of what was being taught and of the research opportunities available to professors in the years from 1860 to 1960. Background is provided in the opening chapters of Part I, which outline the origins of post-secondary education in both French and English Canada from 1635 to 1860, and in the parallel chapters of Parts II to V which describe the establishment of new and the growth of existing institutions during the period 1861-90, 1891-1920, 1921-40, and 1941-60. The remaining chapters of each of the book's main divisions present an examination of the curricula in arts and science, professional education, and graduate studies in 1860, 1890, 1920, 1940, and 1960, as well as the conditions pertaining to scholarship and research in these years. The concluding chapter identifies the characteristics which differentiate Canadian higher education from that of other countries. The book includes a full bibliography, an extensive index, and statistical appendices providing

data on enrolment and degrees granted. A History of Higher Education in Canada 1663-1960 will be the definitive work in its field, valuable both for the wealth of information and the historical insights it contains.

This volume contains papers and reports from the Conference held in Romania, June 2000. The book covers many topics, for example, place, role and content of geotechnical engineering in civil, environmental and earthquake engineering.

Post-secondary education is one of the fastest growing segments of the educational system. In this volume the development and activities of universities, colleges of applied arts and technology, and other institutions of post-secondary education are described in detail. The public and private training activities of business and industry are outlined, and government programs for adult retraining described. Dr Fleming traces the origins of the institutes of technology and the college of applied art and technology, and he provides capsule histories of every university in Ontario.

College students planning to go on to law school will find the most up-to-date information available on nearly 200 ABA-approved law schools across the United States. Profiles include details on admission requirements, academic programs, the school calendar, a capsule description of the faculty, library facilities, tuition and fees, available financial aid, graduation requirements, professional organizations, and student body composition. Several non-ABA schools get brief profiles in a section of their own. The book also offers advice on choosing a law school, getting career counseling, taking the Law School Admission Test (LSAT), and applying to a law school. A sample LSAT with answers and explanations is a bonus feature in this directory.
