The Flying Circus of Physics: Amazon.com: Books
Walker covers the entirety of naked-eye physics by exploring problems of the everyday world. He focuses on the flight of Frisbees, sounds of thunder, rainbows, sand dunes, soap bubbles, etc., and uses such familiar objects as rubber bands, eggs, tea pots, and Coke bottles. Many references to outside sources guide the way through the problems.

The Flying Circus of Physics book by Jearl Walker
I've been reading a 1975 edition of Jearl Walker's The Flying Circus of Physics. You may know Walker for his Amateur Scientist column in Scientific American. He would tell us how we could use the stuff in our households to make anything from a camera to a radio -- how we could do experiments in fluid mechanics or in biology.
