Providing courtroom testimony. A forensic anthropologist's primary function is to analyze remains, as opposed to collecting and preserving them as evidence. Forensic anthropologists are often called to scenes where decomposed remains are found in order to begin analysis before the remains are moved.

~~Forensic Anthropologist Job Description: Salary, Skills ...~~

Forensic anthropology, application of physical anthropology to legal cases, usually with a focus on the human skeleton. Forensic anthropology uses the techniques of physical anthropology to analyze skeletal, badly decomposed, or otherwise unidentified human remains to solve crimes. Forensic anthropologists can assess the age, sex, and unique features of a decedent and are invaluable in documenting trauma to the body and estimating how long a corpse has been decomposing.

~~Forensic anthropology | science | Britannica~~

A forensic anthropologist can read the evidence in a skeleton like you read a book. The techniques they use to answer questions in criminal cases can be applied to skeletons of any age, modern or ancient. The stages of growth and development in bones and teeth provide information about whether the remains represent a child or adult.
