| <p>Today we usually think of a book of poems as composed by a poet, rather than assembled or adapted by a network of poets and readers. But the earliest European vernacular poetries challenge these assumptions. Medieval songbooks remind us how lyric poetry was once communally produced and received<span>!</span>a collaboration of artists, performers, live audiences, and readers stretching across languages and societies. The only comparative study of its kind, Songbook treats what poetry was before the emergence of the modern category <span> </span><span>[</span><span>poetry</span><span>]</span>: that is, how vernacular songbooks of the thirteenth to fifteenth centuries shaped our modern understanding of poetry by establishing expectations of what is a poem, what is a poet, and what is lyric poetry itself. Marisa Galvez analyzes the seminal songbooks representing the vernacular traditions of Occitan, Middle High German, and Castilian, and tracks the process by which the songbook emerged from the original performance contexts of oral publication, into a medium for preservation, and, finally, into an established literary object. Galvez reveals that songbooks<span>!</span>in ways that resonate with our modern practice of curated archives and playlists<span>!</span>contain lyric, music, images, and other nonlyric texts selected and ordered to reflect the local values and preferences of their readers. At a time when medievalists are reassessing the historical foundations of their field and especially the national literary canons established in the nineteenth century, a new examination of the songbook<span>'</span>s role in several vernacular traditions is more relevant than ever.</p> |
| <p>The Queen who shaped the music, literature, architecture, and painting of late medieval Spain.</p>   |
| <p>Musical Culture in the World of Adam de la Halle explores the 13th-century composer<span>'</span>s music, drama, and poetry in the context of his urban environment. The authors use approaches from musicology, history, art history, and literary studies.</p>   |
| <p>Stolen Song documents the act of cultural appropriation that created a founding moment for French literary history: the rescripting and domestication of troubadour song, a prestige corpus in the European sphere, as French. This book also documents the simultaneous creation of an alternative point of origin for French literary history<span>!</span>a body of faux-archaic Occitanizing songs. Most scholars would find the claim that troubadour poetry is the origin of French literature uncomplicated and uncontroversial. However, Stolen Song shows that the "Frenchness" of this tradition was invented, constructed, and confected by francophone medieval poets and compilers keen to devise their own literary history. Stolen Song makes a major contribution to medieval studies both by exposing this act of cultural appropriation as the origin of the French canon and by elaborating a new approach to questions of political and cultural identity. Eliza Zingesser shows that these questions, usually addressed on the level of narrative and theme, can also be fruitfully approached through formal, linguistic, and manuscript-oriented tools.</p>   |
| <p>For more than two decades, le hip hop has shown another face of France: danced by minorities associated with immigration and the suburbs, it has channeled rage against racism and unequal opportunity and offered a movement vocabulary for the expression of the multicultural difference that challenges the universalist discourse of the Republic. French hip-hoppers subscribe to U.S. black culture to articulate their own difference, but in France hip-hop was championed by a Socialist cultural policy, subsumed into the cultural heritage, and instituted as a pedagogy. France supported hip-hop dance as an art of the suburbs: a multicultural mix of North African, African and Asian forms that circulate with classical and contemporary dance performance. French hip-hop develops into concert dance, becoming a civic discourse and legitimate employment, not through the familiar model of a culture industry, but within a Republic of Culture. It nuances an Anglo-Saxon model of identity politics with a francophone identity poetics and grants its dancers a national profile as artists who develop dance techniques and transmit body-based knowledge. This book, the first in English to introduce readers to the French hip-hop movement, analyzes the choreographic development of hip-hop into la danse urbaine, touring on national and international stages, as hip-hoppers move beyond the suburbs, figuring new forms within the</p>  |

mobility brought by new media and global migration.

The Bloomsbury Encyclopedia of Popular Music Volume 1 provides an overview of media, industry, and technology and its relationship to popular music. In 500 entries by 130 contributors from around the world, the volume explores the topic in two parts: Part I: Social and Cultural Dimensions, covers the social phenomena of relevance to the practice of popular music and Part II: The Industry, covers all aspects of the popular music industry, such as copyright, instrumental manufacture, management and marketing, record corporations, studios, companies, and labels. Entries include bibliographies, discographies and filmographies, and an extensive index is provided.

First full comprehensive guide to one of the most important genres of music in the middle ages.
