Hi All, I have a Fuji Electric Frenic 5000 M2 VFD in my HAAS VF1. I get a spindle turning alarm when trying to change gears. I traced the problem to the spindle at speed logic output from the VFD. If I disconnect this wire from the I/O board, the spindle slows to the gear change speed, changes gears and resumes at the new speed.

~~Fuji Frenic manual? — Practical Machinist~~

• The FRENIC-VG may not be used for a life-support system or other purposes directly related to the human safety. • Though the FRENIC-VG is manufactured under strict quality control, install safety devices for applications where serious accidents or property damages are foreseen in relation to the failure of it. An accident could occur.
