Development Planning For Coalbed
May 2017 G. Moricca 42 Field
Development Planning is the
process of evaluating multiple
development options for a field and
selecting the best option based on
assessing tradeoffs among multiple
factors: Net present value,
typically the key driver of
decisions for publicly-traded
operators. Oil and gas recovery
Operational flexibility and
scalability Capital versus operating
cost profiles Technical, operating
and financial risks.

field and selecting the best option based on assessing tradeoffs among multiple factors: Net present value, typically the key driver of decisions for publicly-traded operators.

Field Development Planning - Halliburton

Oil and gas exploration and exploitation require a large amount of economical resources mainly in offshore environments thus, field development planning has the main objective of maximizing the revenue for a given investment, this is maximizing the utility index (UI) defined as $UI = NPV/NPI$, where NPV is the net present value and NPI is the net present investment value.
