Autumn is a time of plenty for the birds. If the weather remains mild and the natural food supply is good, birds don't need to resort to bird feeders for food. They instinctively prefer the natural food in the form of seeds and berries. It can be quite late in the year before the birds start showing interest in our garden offerings again.

Once upon a time (or maybe twice), some 80,000 leagues beneath the sea, there lay a colorful land of song and laughter called Pepperland, where Sergeant Pepper's Band was always playing your song -- until the Blue Meanies burst on the scene and chased all the music and magic away. So began the classic 1968 film *Yellow Submarine*, inspired by a song and hailed as an avant-garde amalgam of pop art, Beatles music, and highly innovative animation. Now that film's dazzling images -- and its lighthearted, witty tale -- is showcased in a glorious picture book sure to be savored by fans and readers of all ages.

Why doesn't self-help help? Millions of people turn to self-improvement when they find that their lives aren't working out quite as they had imagined. The market for self-improvement products - books, audiotapes, life-makeover seminars and regimens of all kinds - is exploding, and there seems to be no end in sight for this trend. In "Self-Help, Inc.: Makeover Culture in American Life", cultural critic Micki McGee asks what our seemingly insatiable demand for self-help can tell us about ourselves at the outset of this new century. The answers are surprising. Rather than finding an America that is narcissistic or self-involved, as others have contended, McGee sees a nation relying on self-help culture for advice on how to cope in an increasingly volatile and competitive work world. For Americans today, a central component of working has become working on themselves. "Be all one can be," they are told. Build your own personal brand. As women have entered the paid labor force in growing numbers, the Protestant work ethic has been augmented by a Romantic imperative that one create a vision - a script - for one's life.; More and more, Americans are compelled to regard themselves in effect as "human capital." No longer simply an enterprising or entrepreneurial individual, the new worker is the artist and the artwork, the "CEO of Me, Inc.," in Tom Peters' memorable phrase, and the central product line. "Self-Help, Inc." reveals how makeover culture traps Americans in endless cycles of self-invention and overwork as they struggle to stay ahead of a rapidly restructuring economic order. A lucid and fascinating treatment of the modern obsession with work and self-improvement, this book will strike a chord with its diagnosis of the self-help trap and with its suggestions for how we can address the alienating conditions of modern work and family life.

As topical today as when it was first published in 1938, this book tells of Bartholomew Cubbins (from Caldecott Honor winner Bartholomew and the Oobleck) and his unjust treatment at the hands of King Derwin. Each time Bartholomew attempts to obey the king ' s order to take off his hat, he finds there is another hat on his head. Soon it is Bartholomew ' s head that is in danger . . . of being chopped off! While *The 500 Hats* is one of Dr. Seuss ' s earliest works, it is nevertheless totally Seussian, addressing subjects that we know the good doctor was passionate about: abuse of power (as in *Yertle the Turtle*), rivalry (as in *The Sneetches*), and of course, zany good humor!

"The whole world operates on coal, boys. Men will kill for it. That makes a miner pretty damn powerful." Powerful, yes. But in the viperous worlds of mining, union organizing and warfare, digging coal can make a miner a sitting duck, too. Alan Tanner reckons he's just another coalass trying to make a living, care for his family and have a little fun. Trouble is, death stalks him. His mine explodes and the stench of bloody carcasses lingers. The UMW secretly organizes and risks a strike. Brutal guards and soldiers threaten. Gunrunning flourishes. Hostilities rupture into battle. After fending off machine gun and rifle fire all day, the young miner watches helplessly as the tent homes of a thousand strikers erupt in flame. The "New York Times" calls it "the Ludlow Massacre." Screams of widows and orphans haunt him. It's time for vengeance. The subsequent war that consumes Tanner becomes the bloodiest, costliest labor dispute in American history. With "The Red-Winged Blackbird," the long-overlooked Colorado coal strike of 1913-14 springs to life with an urgency that can only come from one who lived it. By turns humorous and heart-rending, Tanner's story chronicles the depths men will plummet for hunks of coal and the right to dig them.

The best-selling author of *Devil in the White City* documents the efforts of first American ambassador to Hitler's Germany William E. Dodd to acclimate to a residence in an increasingly violent city where he is forced to associate with the Nazis while his daughter pursues a relationship with Gestapo chief Rudolf Diels.

By the time he is twelve, Frank Levy understands that to attain his wishes, he must depend upon himself. In the young adult edition of *Life with an Accent* we meet Levy as a happy toddler oblivious to political dangers. Seeking safety, in 1936 his family moves from Germany to the British Mandate of Palestine. Ten years later they emigrate to America to be with grandma. Again, Levy must change languages, cultures, even his name. With every effort to adapt, he sees that the history we live through matters.
