iCloud is something that Apple doesn't talk a lot about but is perhaps their biggest service. It's estimated that nearly 850 million people use it. The thing about it, however, is many people don't even know they're using it. This short book will help new users navigate their way around the cloud service.

iCloud does a lot of amazing things: It keeps your mail, contacts, calendars, reminders, and notes in sync. It instantly (almost magically) copies that photo you took of your cousin on your iPhone to your Mac, iPad mini, and laptop. It lets you work with your Macs from afar. It helps you find stranded and wayward devices, and lets you know when your friends are nearby. And it

does it all for free. iCloud encompasses so very many different features and fun bits that it's surprising to realize just how much you can do with a free account. Let Macworld's editors help you get the most out of it. This book collects all the material we've written in the last year on Apple's sync service, and we hope it will help you get to know iCloud and learn how best to use it in your life. This book focuses on OS X 10.8 (Mountain Lion), Windows 8, iOS 6, and iTunes 11 - but we still have some helpful hints for those users with older operating systems. We hope that you enjoy our Starter Guide, but, even more important, that you enjoy iCloud and find ways to incorporate it into your daily routine. If you want to learn more about your

app and gave up because it doesn't work as expected or the app crash? Have you tried some of the iOS books and blogs, but still, you could not get to the end? Do you wish someone wrote a book that shows you exactly how to use the UIDocument API in a Swift app? No need to struggle anymore because this book shows you step-by-step how to use the UIDocument API in a real-world Swift app that store documents locally or in iCloud. Here are some of the skills you are going to learn in the book. Subclass and configure the UIDocument class in a Swift file Use an instance of the UIDocument subclass in the app's view controllers to do document and media operations Ask the user to choose local or iCloud storage at the initial app launch
