An edition of Getting what you came for (1997) Getting what you came for the smart student's guide to earning a Master's or a Ph.

Is graduate school right for you? Should you get a master's or a Ph.D.? How can you choose the best possible school? This classic guide helps students answer these vital questions and much more. It will also help graduate students finish in less time, for less money, and with less trouble. Based on interviews with career counselors, graduate students, and professors, Getting What You Came For is packed with real-life experiences. It has all the advice a student will need not only to survive but to thrive in graduate school, including: instructions on applying to school and for financial aid; how to excel on

qualifying exams; how to manage academic politics—including hostile professors; and how to write and defend a top-notch thesis. Most important, it shows you how to land a job when you graduate.

This is a book for dedicated academics who consider spending years masochistically overworked and underappreciated as a laudable goal. They lead the lives of the impoverished, grade the exams of whiny undergrads, and spend lonely nights in the library or laboratory pursuing a transcendent truth that only six or seven people will ever care about. These suffering, unshaven sad sacks are grad students, and their salvation has arrived in this witty look at the low points of grad school. Inside, you'll find: • advice on maintaining a veneer of productivity in front of your advisor • tips for sleeping upright during boring seminars • a description of how to find which departmental events have the best unguarded free food • how you can convincingly fudge data and feign progress This hilarious guide to surviving and thriving as the lowliest of life-forms—the grad student—will elaborate on all of these issues and more.

Considered by many to be mentally retarded, a brilliant, impatient fifth-grader with cerebral palsy discovers a technological device that will allow her to speak for the first time.

A comprehensive guide to graduate school helps prospective students decide whether and where to go, what to study, how to apply, how to pay for it, and how to excel in it, and features advice from admissions officers and experienced students. Original.

As her son grows up from little boy to adult man, a mother secretly rocks him each night as he sleeps.

The inspiring, life-changing bestseller by the author of LEADERS EAT LAST and TOGETHER IS BETTER. In 2009, Simon Sinek started a movement to help people become more inspired at work, and in turn inspire their colleagues and customers. Since then, millions have been touched by the power of his ideas, including more than 28 million who've watched his TED Talk based on START WITH WHY -- the third most popular TED video of all time. Sinek starts with a fundamental question: Why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. START WITH WHY shows that the leaders who've had the greatest influence in the world all think, act, and communicate the same way -- and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.

"This book is lewd, rude and superb! Frank and Stein have written the first guide to grad school from a student's point of view; and the result is an irreverent, humorous and USEFUL book of advice. These foul-mouthed sages will help you get through a master's or doctoral program more quickly, with fewer blunders and less angst. I plan to recommend this book to all the graduate students I coach and teach." -Mary McKinney, Ph.D. Clinical Psychologist and Dissertation Coach <http://www.successfulacademic.com> Yes, sports fans!, er, grad school fans Bad boys Fred and Karl are back with an updated version of their best selling self-help guide for grad students. This New and/or Improved Version is stocked with additional content, more lame attempts at humor, and a lower price (Karl threatened to moon the publisher unless his demands were met). Written with the attitude of a couple ill-mannered schoolboys who exhibit the insight and genius of the Ph.D.'s who wrote it, Playing the Game simplifies even the most complex aspects of grad school. Authors Frank and Stein have broken down Playing The Game into three hilarious and straightforward sections: Getting In, Getting Through, and Getting the Hell Out. In whatever stage of graduate school you find yourself, rest assured that you will never again grumble, "If only I had known! If only someone had explained this @%#! to me sooner!" Playing the Game simplifies the entire graduate school experience while imparting comically relevant stories and translating complicated graduate school jargon. This self-help guide helps grad students to comprehensively navigate their graduate school journey from application to matriculation. Unlike most of the material you'll be reading in grad school, Playing the Game is actually intelligible. www.playing-the-game.com

This book provides college students with the information they need to apply successfully to graduate school. Misconceptions about graduate school are revealed and dispelled, including the most common myth • that one must have excellent grades to get in, and that excellent grades are all one needs. Other factors that may play a bigger role than GPA are discussed, and the reader discovers how the process of selecting applicants actually works in most graduate programs.

This love letter written from mother to child invites readers to experience a baby's month-by-month development in the womb as compared to familiar fruits and vegetables. A mother lovingly describes the sizes and stages of her baby's month-by-month development inside the womb, and the amazement of experiencing it from the outside. Look at you - as big as a banana! Some of your cells formed into bones, and your arms and legs grew longer. I could feel you kick! Sometimes when I rubbed my belly, I felt you thump back. Was that your way of saying hello? Simple, age-appropriate facts are woven into a tender and lyrical text that celebrates the miracle of a baby. It demystifies and informs readers, while simultaneously appreciating the wonder of it all. A perfect read-aloud for mother and child, or for children whose mothers are pregnant with a younger sibling.

Young Cassie Logan endures humiliation and witnesses the racism of the KKK as they embark on a cross-burning rampage, before she fully understands the importance her family attributes to having land of their own.
