A Reuters article from April 13, 2015 titled "China to surpass U.S. as top cause of modern global warming" talked about how China has overtaken the U.S. as the lead pollution in the world and what this means in the fight against global warming. To describe the transition to being the world's largest emitter, the article quoted Glen Peters of the Center for International Climate and Environmental Research, Oslo, who said, "A few years ago China 's per capita

Warming (668 words, 2 pages)

Even though the Earth seems like it is completely stable, the environment is being damaged. For example, because of forest destruction, floods occur since there are no trees to drink the rain. The people of the world have caused this, but there is still time to make a difference to keep the earth clean ...
