The process of globalization refers to the merging of national economies on an international level. This has resulted in a change of the labor culture in countries. The positive effects of globalization on workers can be observed through increased standards of living in countries. Additionally, workers from specific areas can travel and pursue better employment in other countries.

Positive Effects of Globalization on Workers | Bizfluent

A significant interdisciplinary body of literature has examined the social and economic effects of low-skill, low-wage manufacturing jobs on workers in poor countries. Some discussions of globalization focus on the exploitative effects and others highlight the positive developmental effects. Whether globalization increases economic power and social autonomy or creates grievances (or both), its effects outlined in this literature are familiar determinants of political participation.
