Circles for more than six centuries. Nabil Safwat and David Pendlebury worked on the project for more than three years at the behest of the Sufi Trust.

The most broadly accepted explanation of Sufism is the etymological derivation of the term from the Arabic for “wool,” *ʿanf*, associating practitioners with a preference for poor, rough clothing. This explanation clearly identifies Sufism with ascetical practice and the importance of manifesting spiritual poverty through material poverty. In fact, some of the earliest “Western” descriptions of individuals now widely associated with the larger phenomenon of Sufism identified them

altered states among the early Sufis. It examines samâ` - listening to ritual recitation, music and certain other aural phenomena - and its effect in inducing unusual states of consciousness and behaviours. The focus is on the earliest personalities of the Islamic mystical tradition, as mediated by texts from the tenth to the twelfth centuries C.E. These unusual states are interpreted in the light of current research in Western psychology, and also in terms of their integration into historical Islamic culture. A Psychology of Early Sufi Samâ` provides new insights into the work of five Sufi authors, and a fresh approach to the relation between historical accounts of altered states and current psychological thinking.

Quran and Sufism, this book is the first comprehensive study of Sufi Qur'anic commentaries and includes translations of many writings previously unavailable in English. It examines the shared hermeneutical assumptions of Sufi writers and the diversity in style of Sufi commentaries. Some of the assumptions analyzed are: * the Qur'an is a multi-layered and ambiguous text open to endless interpretation * the knowledge of deeper meanings of the Qur'an is attainable by means other than transmitted interpretations and rational thought * the self is dynamic, moving through states and stations which result in different interpretations at different times. The styles of Sufi commentaries are explored, which range from philosophical musings to popular preaching to literary narrative

and poetry. Other commentaries from the classical period are also investigated to provide context in understanding Sufi approaches and exegetical styles.

From Rumi's whirling dervishes in Turkey over 700 years ago, to circles of silent mystics in the West today, this book reveals the history and practices of Sufism, the ancient but still active system of Islamic mysticism which has long been the spiritual current in Islam that counterbalances fundamentalism. Eric Geoffroy is an authority on Sufism, and he shows us this increasingly popular contemplative dimension of Islam, which is little understood in the West.

Spiritual Grammar identifies a genre of religious literature that until now has not been recognized as such. In this surprising and theoretically nuanced study, F. Dominic Longo reveals how grammatical structures of language addressed in two medieval texts published nearly four centuries apart, from distinct religious traditions, offer a metaphor for how the self is embedded in spiritual reality. Reading *The Grammar of Hearts* (Nahw al-qul) by the great Sufi shaykh and Islamic scholar 'Abd al-Karim al-Qushayr (d. 1074) and *Moralized Grammar* (Donatus moralizatus) by

Christian theologian Jean Gerson (d. 1429), Longo reveals how both authors use the rules of language and syntax to advance their pastoral goals. Indeed, grammar provides the two masters with a fresh way of explaining spiritual reality to their pupils and to discipline the souls of their readers in the hopes that their writings would make others adept in the grammar of the heart.
