For all of the preaching and pontificating about why the manual transmission is the only real "enthusiast" choice for a GTI, the fact remains that when it comes down to numbers, the DSG is a better transmission. No matter how you slice it, the DSG has been a revelation of performance, efficiency, and reliability.

The DSG is also 11 kilograms heavier than its 1313kg manual counterpart and claims a higher average fuel consumption figure at 6.6L/100km (versus the manual's 6.2L/100km).

On paper the DSG transmission in the GTI is a \$1,100 option above the manual. However it looks like among dealers in my area (Texas), the MTs are much more rare (except in Golf R) and almost invariably they cost \$1000 MORE than DSG, not less. I assume this is related to supply and demand, as most people choose auto I think.

Obviously, manual is more engaging, with the downside being you can't disengage when you're stuck in traffic. DSG offers the ability to just stick it in auto, but to be honest, it's jerky and awkward at low speeds if left to shift on its own. DSG requires more maintenance (every 40K).

Manual mode on DSG is way more fun and engaging than 'true' manual. Maybe the issue is when comparing the DSG/S-tronic to the manual Audi S4 or GTI or Golf R etc, since those VW-group manuals are all a bit on the clunky side, with long throws? :) Klaatu writes...

Posted February 2, 2018. Manuals are slower, a pain in traffic and have very weak clutches that often struggle with stock power let alone modified. DSG's are great if you are feeling lazy, much faster and very involving, controllable, and fun if you take the time to learn how to actually properly use it in full manual mode.
