Green living begins at home, and New Green Home Solutions tells you how. Most of the energy-derived pollution we produce comes as a direct result of our homes - how we heat them, how we cool them, how we keep them well-lit and full of things that make our lives so comfortable. The good news is that we have tremendous power to create change. Renewable energy design, better insulation and more efficient appliances could reduce energy demands by 60 to 80 percent. By embracing conservation and renewable energy, we can win our energy independence and help save the planet. Dave Bonta, president and founder of USA Solar Stores, the largest alternative energy retailer in the Northeast, has written about alternative energy and sustainable living for Green Living, Back Home Magazine, Alternative Energy Retailer and The Vermont Guardian. Bonta has studied renewable energy and energy efficiency for more than twenty years, is a frequent speaker at major green energy conferences across America and is a tireless advocate for green living. Also president of BioQuantum, Inc., a bio-fuels company, Bonta is the creator of BackHome chapters in America and is president of a renewable energy community organization, The Sustainable Valley Group. Stephen Snyder, communications director for USA Solar Stores, left New York City in 1995 to start an organic herb farm in Vermont with his wife, Melissa. He holds a degree in radio, television and motion picture communications

from the University of North Carolina at Chapel Hill and has broad experience in communications, public affairs, and media relations. He also works as a freelance writer and has published *The Brewmaster's Bible* (HarperCollins), *The Beer Companion* (Simon & Schuster) and *The Brewmaster's Recipe Manual*.

In this second book in the internationally successful No-Waste Gardening series, learn how to recycle and repurpose your way to a successful, productive, and eco-friendly organic garden! In *No-Waste Organic Gardening*, author Shawna Coronado guides you toward a more sustainable landscape with dozens of tips, tricks, and solutions that save you time and money—all while saving the planet, too! A revision of Shawna's previous title, *101 Organic Gardening Hacks*, this new book tackles waste-reducing gardening in a clever, accessible way. Learn how to: Upcycle household discards to grow seedlings Turn yard debris into “black gold” in a DIY compost bin Control pests with traps made from household discards Build a rain barrel from an old trash can Mix up your own potting soil to reduce plastic bag waste Protect spring plantings with repurposed jugs, jars, and containers Build a new raised bed with everyday items—no power tools required! Plus, you'll find solutions to common garden problems and plenty of innovative and resourceful ways to reduce your outgoing

waste. Conquering the increasingly important art of responsible gardening is a whole lot easier than you might think, with help from No-Waste Organic Gardening. For more advice on living waste-free, explore the first book in the No-Waste Gardening series, No-Waste Kitchen Gardening.

Create simple solutions for growing organic gardens! The word "hack" has a multitude of meanings these days, but if you ask garden author Shawna Coronado what a hack is, she might just wave her hand toward her own back yard. She could be pointing at the garden bench she created from leftover wood posts and a few cinder blocks, or the rows of wine bottles buried soldier-style along a winding pathway, or even the garden soil itself, which is blended by hand from an organic soil recipe she devised. A hack is really just a great idea that's come to life. In 101 Organic Garden Hacks you'll find the top tips, tricks, and solutions Shawna has dreamed up in her career as one of America's most creative gardeners. Some are practical timesavers; others offer clever ways to "upcycle" everyday items in your garden. One characteristic every hack shares is that they are completely organic and unfailingly environmentally friendly. Divided into a dozen different categories for easy reference, each hack is accompanied by a clear photo that shows you exactly how to complete it. If you are looking for

"I have always been inspired by people that are willing to make a stand for what they believe in . on November 9, 1995, the doctors at the Hospital for Sick Children, Toronto, CANADA, told me that my daughter's bone marrow had stopped producing blood. She would need on-going transfusions to stay alive. I am a Jehovah's Witness and accept the command in "the Bible" that prohibits the use of blood. My "Search for a Clean Bill of Health" starts in Canada, takes me into the United States, then on to Europe and most recently now to the Middle East. I have come to understand through my experience that courage is in fact the conquest of fear, not the absence of fear."

assistance, integration and collaboration of IT department and vendors, i.e. custom and vendor application development and reporting tools, Green IT examples, business intelligence dashboards that can perform analytical and predictive analysis of green related business data. Outlines the major benefits to be gained through Green initiatives with IT Shows you how your business can strategize, plan, implement, assess Green initiatives solutions with IT Explores how to develop Green initiative strategies, plans, projects, and assessments that integrate IT resources and offerings effectively. Practical and thorough, this book includes helpful checklists, glossary, and resources to get started with your business's Green initiatives.

There are main basic food items that we already have in our home that can be used as DIY natural cleaning solutions or what's termed as green cleaning. You just have to know which of them can be used to clean what. This includes vinegar, baking soda, salt, olive oil, and other items that are discussed in "Green Cleaning 101 - DIY Natural Cleaning Solutions with Vinegar and Other Frugal Resources That You Already Have". White vinegar is the most dominant ingredient throughout. You might not even need to go out and buy anything extra. But if you're frugal like more of us are becoming these days, it'll cost less than commercial brands and

## Read Online Green Living Solutions

will still get the job done for you in an eco-friendly way which is expanded upon. Are you sensitive or allergic to toxic chemical cleaning solutions? When you open or twist off the cap, does your head throb? Do your eyes start watering? Does it become hard to breathe while you're in a room trying to clean it? Well, a DIY book on green cleaning is the way to go and it's really not difficult to do. You just have to be willing to measure and mix easy solutions. Make a large enough amount that will last you for a few cleanings and then you won't need to do it again for a while. Simply double or triple what it says to do and that's all there is to it. Numerous recipes are shared for cleaning floors, toilets, bathtubs, walls, windows, countertops, sinks, mirrors, carpet, clothing, removing rust, etc. There's also a special natural deodorizing solution that not too many know about. NOTE: This particular book mentions some additional items that aren't necessarily food-based but definitely should be included in the mix, so to speak. It even gives suggestions on what cleaning tools you should use to clean specific things with. (You'll see what I mean.) Put "Green Cleaning 101 - DIY Natural Cleaning Solutions with Vinegar and Other Frugal Resources That You Already Have" into action for a healthier environment for you and your family. You'll be glad you did!

Award-winning designer and author Lori Dennis

## Read Online Green Living Solutions

proves interior design can be both stylish and environmentally sustainable in this easy-to-use, entertaining guide. Dennis discusses every aspect of interior design—furniture and accessories, window treatments, fabrics, surface materials, appliances, plants, and more—from a green perspective in terms of reducing waste and pollution and turning a home into a healthy, comfortable environment. Readers will learn how to: - use sustainable materials like bamboo, cork, and recycled glass to enhance interiors - search thrift shops and antique stores for vintage hidden treasures - find the best vendors for purchasing green products - use plants and locally cut flowers to improve indoor air quality and brighten up rooms - replace lawns with indigenous plants and edible gardens - keep rooms clean with effective and nontoxic products - use energy efficient lighting and maximize natural light - apply for different types of green certification. Packed with over 100 color photographs, lists of the best green vendors, and profiles of leading green designers, this book is a thorough guide for anyone who wants to create beautiful interiors while lessening the waste and pollution generated by the building industry. Allworth Press, an imprint of Skyhorse Publishing, publishes a broad range of books on the visual and performing arts, with emphasis on the business of art. Our titles cover subjects such as graphic design, theater, branding, fine art, photography,

We often publish in areas overlooked by other publishers and welcome the author whose expertise can help our audience of readers.

IN PREFAB GREEN, architect Michelle Kaufmann shares her vision of creating thoughtful, sustainable design for everyone. Her firm, Michelle Kaufmann Designs, blends sustainable home layouts, eco-friendly materials, and low-energy options to create a "prepackaged" green solution to home design. Kaufmann tells about five eco-principles that are present in every design her firm creates-smart design, eco-materials, energy efficiency, water conservation, and healthy environment-and how each work together to create homes that make a difference. Michelle Kaufmann founded Michelle Kaufmann Designs in 2002. Michelle's work is widely published and her homes have been showcased in a number of museums including the National Building Museum, the Vancouver Art Center, MOCA in Los Angeles, and Chicago's Museum of Science and Industry. Michelle lives in Marin County, California. Cathy Remick has worked as a staff architect and designer for several national firms in San Francisco and Washington, D.C. She is a
