GSM is a circuit-switched system that divides each 200 kHz channel into eight 25 kHz time-slots. GSM operates on the mobile communication bands 900 MHz and 1800 MHz in most parts of the world. In the US, GSM operates in the bands 850 MHz and 1900 MHz. GSM owns a market share of more than 70 percent of the world's digital cellular subscribers.

The GSM range from BPT is a telephone based door entry solution. Using GSM mobile or landline technology, this system is designed for applications where a hard wired door entry system cannot be installed. Telephone based technology is ideal for use in environments where there is an excessive distance between a gated entrance and the main building or applications where the entry panel needs to call a
