The first magazine devoted entirely to do-it-yourself technology projects presents its 28th quarterly edition for people who like to tweak, disassemble, recreate, and invent cool new uses for technology. Express your inner child with MAKE Volume 28, featuring toys and games. Any maker can tell you that lots of experimentation and play time are essential to developing brainpower and creativity. This issue pays tribute to the beloved toys and games you grew up with and their evolution through technology.

"Renowned luthier John S. Bogdanovich crafted the project shown inside for his own personal use. The design he presents is simple but elegant and is a composite of ideas borrowed from several different guitars admired for their tonal qualities and aesthetic details. In close-up photographs Bogdanovich invites you to stand by his side and follow the entire process from start to finish. He offers guidance through every step, and explains every decision, from the arrangement of his workbench and the selection of the wood, to tuning and setting up the instrument. Bogdanovich also provides a choice of alternative methods and materials -- to help you find your own style of working, and to enable you to add your personal touches to your project. By the time your instrument is finished, you'll have acquired a world of knowledge, from the difference between quartersawn and flat-sawn wood to the pros and cons of lacquer versus French polish. You'll have mastered dozens of skills, including bending and laminating wood and cutting and seating wire frets. Best of all, you'll have a beautiful instrument, designed to your own specifications, that will give pleasure to everyone who

An illuminating journey through today's fascinating world of design. What can we learn from the ways great designers think-and how can it improve our lives? In *CAD Monkeys*, *Dinosaur Babies*, and *T-Shaped People* Warren Berger, in collaboration with celebrated designer Bruce Mau, revolutionizes our understanding of design and unlocks the secrets of the trade. Looking to the creative problem-solving work of design professionals, Berger reveals that design is a mindset, a way of looking at the world with an eye toward improving it. The practice of design-thinking opens readers to their innate capacity for reimagining the world around them.

construction. 8-1/2 x 11 .

The dictionary intends to provide conventional spelling and short descriptions of the most common terms used in modern lutherie (construction of stringed musical instruments) as well as historical terminology that a modern luthier may come across in plans and other media. Luthiers, musicians, and others that read or write about stringed musical instrument construction should find it useful. Lutherie beginners who are attempting to navigate a mass of unfamiliar terminology will find the dictionary particularly useful. Use of the dictionary will increase the rate of understanding for the new luthier. As with any such work appearing in book form there is a trade off between completeness and accessibility. Although it certainly is possible to include a lot more terms than currently appear, doing so would make for a larger and more expensive book and it would make looking up terms more time consuming. The number of terms presented offer a good balance.

The first choice of aspiring guitar makers for more than 30 years For some, it is not enough to buy a guitar--the challenge of designing and hand-making a unique, customized instrument is the dream. Since 1986, these people have turned to one book: *Make Your Own Electric Guitar*. Written in a clear, relaxed style, it covers every facet of guitar design and construction, as well as electronic theory and practice, and full woodworking and wiring techniques--all supported with plenty of photos and diagrams. Now in a revised and expanded third edition, *Make Your Own Electric Guitar* will enable any musician or enthusiast with basic woodworking skills to create a uniquely valuable instrument.
