The New York Times bestselling author of *Bitter Brew* chronicles the birth and rise to greatness of the American auto industry through the remarkable life of Harley Earl, an eccentric six-foot-five, stuttering visionary who dropped out of college and went on to invent the profession of automobile styling, thereby revolutionized the way cars were made, marketed, and even imagined. Harley Earl's story qualifies as a bona fide American family saga. It began in the Michigan pine forest in the years after the Civil War, traveled across the Great Plains on the wooden wheels of a covered wagon, and eventually settled in a dirt road village named Hollywood, California, where young Harley took the skills he learned working in his father's carriage shop and applied them to designing sleek,

racy-looking automobile bodies for the fast crowd in the burgeoning silent movie business. As the 1920s roared with the sound of mass manufacturing, Harley returned to Michigan, where, at GM's invitation, he introduced art into the rigid mechanics of auto-making. Over the next thirty years, he functioned as a kind of combination Steve Jobs and Tom Ford of his time, redefining the form and function of the country's premier product. His impact was profound. When he retired as GM's VP of Styling in 1958, Detroit reigned as the manufacturing capitol of the world and General Motors ranked as the most successful company in the history of business. Knoedelseder tells the story in ways both large and small, weaving the history of the company with the history of Detroit and the Earl family as Fins examines the effect of

The Art of Monsters, Inc. opens the door into Pixar's colorful archives of concept art and to the endearing story of Monsters, Inc. Since the very first bedtime, children around the world have known that once their parents tuck them into bed and shut off the light, monsters lie waiting behind closet doors, ready to emerge. But what they don't realize is that these monsters scare children because they have to. It's their job. This superb film from Pixar Studios, the people who brought you Toy Story, A Bug's Life, and Toy Story 2, reveals the truth about monsters with the brilliant techniques that have earned them their reputation as a ground-breaking

Corvette and concluding with the return of an icon, the stunning 2014 Corvette Stingray. Using a unique style of portraiture known as light-painting, acclaimed photographers Randy Leffingwell and Tom Loeser present the most recognizable, unique, and historic Corvettes ever produced. From the chrome-lined grilles of the 1953 Roadster and sexy curves of the first C3s to the aggressive snarl of the 2012 ZR1 and the bold, blunt powerhouse of the 2014 Corvette Stingray, all are presented in breathtaking color and detail. Rare and one-off cars abound as well, like the 1963 Z06 Sting Ray and one of only a handful of 1967 L88 convertibles. Where members of the herd drive Toyota Camrys and hipster hatchbacks, bikers opt for Harley-Davidsons, Triumphs, and Ducatis, putting themselves out there like raised middle fingers thrust at the ordinary citizens of the world. And just as a motorcyclist's ride is an affront to the sensibilities of the meek and the conventional, so too is the ink on his or her skin. Tattoos have long been an integral part of this culture, the result of the overwhelming number of ex-military men who formed the nucleus of the postwar outlaw motorcycle club scene.
