Deryn Watson CapBIT 97, Capacity Building for Information Technologies in Education in Developing Countries, from which this publication derives, was an invited IFIP working conference sponsored by Working Groups in secondary (WG 3. 1), elementary (WG 3. 5), and vocational and professional (WG 3. 4) education under the auspices ofIFIP Technical Committee for Education (TC3). The conference was held in Harare, Zimbabwe 25th - 29th August 1997. CapBIT '97 was the first time that the IFIP Technical Committee for Education had held a conference in a developing country. When the Computer Society of Zimbabwe offered to host the event, we determined that the location and conference topic reflect the importance of issues facing countries at all stages of developmen- especially Information Technologies (IT) development. Information Technologies have become, within a short time, one of the basic building blocks of modem industrial society. Understanding IT, and mastering basic skills and concepts of IT, are now regarded as part of the core education of all people around the world, alongside reading and writing. IT now permeates the business environment and underpins the success of modem corporations as well as providing government with cost-effective civil service systems. At the same time, the tools and technologies of IT are of value in the process of learning, and in the organisation and management of learning institutions.

Does your child dream of winning a school spelling bee, or even competing in the Scripps National Spelling Bee in the Washington, D.C., area? You've found the perfect place to start. Words of the Champions: Your Key to the Bee is the new official study resource from the Scripps National Spelling Bee. Help prepare your child for a 2020 or 2021 classroom, grade-level, school, regional, district or state spelling bee with this list of 4,000 spelling words. The School Spelling Bee Study List, featuring 450 words, is part of the total collection. All words in this guide may be found in our official dictionary, Merriam-Webster Unabridged (http: //unabridged.merriam-webster.com/)

This volume explores the challenges and solutions experienced within Zimbabwe's economic and social spheres, with particular reference to the "crisis years" (2000-2008) and the "promising turn" (2009-2012). This latter phase was prompted by the formation of the Government of National Unity (GNU). The contributors to the volume pay attention to how individuals and institutions sought to respond to the crisis, critiquing the reactions of various actors and exploring solutions to the various challenges that were experienced. Chapters in this book include reviews of agricultural subsidies, a gendered approach to poverty, the collapse of service delivery (including a particular focus on education), the "look East policy", the expansion of the religious sector, and the experiences of Zimbabwean migrants in South Africa. Underlying these contributions are the concepts of resilience and agency. The authors all highlight the massive challenges that individuals and institutions had to navigate, and acknowledge the creativity deployed in such quests. This book will appeal to scholars in economics, history and economic history, religious studies, education, and political science, as well as the general reader.

What have postcolonial Sub-Saharan African countries achieved in their education policies and programmes? How far have they contributed to successful attainment of the targeted 2015 Millennium Development Goals (MDGs) on education? What were the constraints and barriers for developing an education system that appeals to the needs of the sub-region? Re-thinking Postcolonial Education in Sub-Saharan Africa in the 21st Century: Post-Millennium Development Goals is an attempt to demonstrate that Sub-Saharan Africa has the potential and capability to provide solutions to challenges facing its desire and ability to provide sustainable education to its people. To that end, the contributors are academics with an African vision attempting to come up with African home-grown perspectives to fill the gap created by the lapse of the MDGs as the guiding vision and framework for educational provision in Africa and beyond. The book seeks to articulate and address African issues from an informed as well as objective African perspective. The book is also intended to provide insights to scholars who are interested in studying and understanding the nature of postcolonial education in the Sub-Saharan African region. Given the objectives and themes of this book, it is intended for academic scholars, undergraduate and graduate students, human rights scholars, curriculum developers, college and university academics, teachers, education policy makers, international organisations, and local and international non-governmental organisations that are interested in African education policies and programmes. "Rethinking Postcolonial Education in Sub-Saharan Africa in the 21st Century provides contemporary reflections from multiple perspectives and re-positions the issue of education at the forefront of the debates on African development." - Lamine Diallo, Associate Professor, Wilfrid Laurier University, Canada "The book is a welcome addition to discourses and analyses on education in sub-Saharan Africa with reference to a postcolonial critique and the Millennium Development Goals framework on education in Africa." - Michael Tonderai Kariwo, PhD, Instructor and Research Fellow, University of Alberta, Canada

Covering the fundamentals of electrical technology and using these to introduce the application of electrical and electronic systems, this text had been updated to include recent developments in technology. It avoids unnecessary mathematics and features improved teaching aids, including: worked examples; updated and graded review questions; colour diagrams and chapter summaries. It is designed for use by students on NC, HNC and HND courses in electrical and electronic engineering.

Health Communication: Strategies and Skills for a New Era provides a practical process model for developing a health communication intervention. The book also explores exposure to media and how it shapes our conceptions of health and illness. Using a life stages and environments approach, the book touches on the patient role and how we 'hear' information from health care providers as well as guidance on how to be a thoughtful consumer of health information.
