 Remove the foot peg bracket and the kick starter pedal from its shaft. If the original right side engine case bolts are present, you will need an impact wrench with a #3 Phillips head and a hammer to remove the bolts. Set the impact wrench to "loosen", turning COUNTER CLOCK WISE (anti-clock wise), when it is struck with the hammer.

 Except for the engine change, the 1966 models of CT200 and CT90 were the same--the change in model number reflected a new Honda policy that model numbers would indicate engine-size class. The CT200 and 1966 CT90 had a dual rear sprocket, which created a lower gear range for heavy weight or steep terrain.
