How To Connect Car Stereo To Amplifier | GO AUDIO

Connect the speaker wires to your amplifier using appropriate connectors (such as ring terminals) and to your speakers using the appropriate connectors (such as female spade terminals, see photo). Most speakers have two terminals of varying sizes. The larger terminal is the positive terminal and the smaller is the negative terminal.

How to Install a Car Amp

Connect 4 speaker wires to right and left inputs on the amp. Search along the back of the amp for multiple sets of terminals. Use a screwdriver to loosen the screw attached to each amp terminal, then slide the wire connector into place. Be sure to connect the red wires to the positive terminal, and the black wires to the negative terminal.

3 Easy Ways to Connect Speakers to an Amp - wikiHow

Car amplifiers can draw a lot of electrical current. Many can easily draw up to 50A (amperes) but that's usually only when near maximum power. During normal, low-volume use, they draw only a few amps. Amplifiers are normally connected by a fuse directly to the vehicle's battery for the positive wire.

What Does A Car Amplifier Do? A Detailed Guide For You

Connect the grounding wire from the amplifier wiring kit to the frame of the vehicle. For optimum grounding, the grounding wire should be less than 20 inches and connected to the frame at any available bolt location in the trunk. Step 10 Connect the speakers to the amplifier using standard speaker wire.

How to Install a Stereo Amplifier & Equalizer in a Car ...

Out of this 5 mechanism, we will show you how to connect a subwoofer in a car without using an amplifier and by connecting rear panels. Disconnect the car electrical system or battery completely. Remove the fuse and connect the subwoofer with the main power supply to start with the installation process. Disconnect the speaker from in-built car speaker by doing mounting dock and gaining access on the rear panel of the car stereo by using wiring.

How to Connect a Subwoofer into Car Stereo Without an ...

2) connect the short ground wire to the chassis close to the position of amp 3) connect the other end of the ground wire into the slot on the amp labeled "GND" 4) connect the small blue wire into the slot that says "rem". connect the other side to the back of your car radio. blue wire to blue wire.
