In this darkly comical look at the sinister side of our relationship with the natural world, Stewart has tracked down over one hundred of our worst entomological foes—creatures that infest, infect, and generally wreak havoc on human affairs. From the world's most painful hornet, to the flies that transmit deadly diseases, to millipedes that stop traffic, to the "bookworms" that devour libraries, to the Japanese beetles munching on your roses, *Wicked Bugs* delves into the extraordinary powers of six- and eight-legged creatures. With wit, style, and exacting research, Stewart has uncovered the

most terrifying and titillating stories of bugs gone wild. It's an A to Z of insect enemies, interspersed with sections that explore bugs with kinky sex lives ("She's Just Not That Into You"), creatures lurking in the cupboard ("Fear No Weevil"), insects eating your tomatoes ("Gardener's Dirty Dozen"), and phobias that feed our (sometimes) irrational responses to bugs ("Have No Fear"). Intricate and strangely beautiful etchings and drawings by Briony Morrow-Cribbs capture diabolical bugs of all shapes and sizes in this mixture of history, science, murder, and intrigue that begins—but

developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

for ebook with a fixed layout and larger text for easy reading. While this is a great read-aloud book for parents, teachers, and other adults to share with children, we have chosen fonts that are similar to the way children form letters for easy recognition as they begin to read on their own. The print book is also available in 8.5" x 11" format. Author's Note: I Don't Want to Eat Bugs was written for my daughter, who was two when I wrote this story and didn't like salad, but now she's four and a half and loves it—if I give her plenty of salad dressing! (But don't worry—this isn't a book about eating salad.)

Of course birds, cats, and dogs have a very different idea of what's good to eat, but through this fun adventure, Lisbon learns there is also food meant just for her—and it's good, especially compared with all the offerings from her animal friends. My daughter and I privately call this book the "Ice Cream Story" (she LOVES ice cream so there had to be ice cream involved), and now whenever something funny happens, she says, "We should write a new ice cream story about that." And we have! *I Don't Want to Eat Bugs* is the first book in a planned series called *Lisbon's Misadventures*. I've written the next
