Radionics makes use of something called a rate. The rate taken on a radionic box is a numeric representation for a concept, simply by turning a dial on a radionic wishing machine, and stroking a rubbing plate or stick pad. Usually this concept we are trying to capture in radionics is one of two kinds: Emphasis vs suppression.

~~Radionics, Rates, Amplifying Patterns, and Psionic Magick ...~~

Some radionics practitioners also transmit the rates to distant locations. I do not know how this is done. The egg heads are also looking for ways to automate/computerize the testing procedure. I do not have information on building a radionics testing device or "Abrams machine" To build an activation device start with a small project box.

A 32 Gb thumb-drive used in an Electronic Witness Well (E-Well) can hold over 2,000 witnesses. Electronic witnesses (digital photographs and text data) can be easily sent over the Internet allowing for the balancing of witnesses (targets) that are thousands of miles away. The ability to manage and balance thousands of targets at the same time creates new possibilities in Radionics that did not exist easily before. Consider a bubble of protection that reforms instantly upon breaking. Think about blessings such as Kiss of God (35.5-21.4) or the

Ho'Oponopono Prayer (51.75-97 & 14-12.25 & 82.75-39) being received 24-hours per day! What would be the value of constant spiritual strengthening such as Soul Integration Repair or Spiritual Vampire Repellent? How would improved luck along with everything else mentioned affect those in dangerous professions such as military, firefighters and police? The ability to send balancing programs to thousands of witnesses 24-hours per day will create a whole new way of thinking about Radionics. Instead of balancing where needed, prevention which can not be over balanced becomes a new tool for accomplishing goals. These are subtle changes but the potential for great gain and a new way of doing things added to our already vast tool box of Radionics can be invaluable. This book provides step by step instructions with color photos of how to build your own E-Well. The only tools needed are a screwdriver, electric drill and a hot glue gun. You must have some skills using these tools or you can ask someone else to make the device for you. Most of the parts needed are available from Kelly Research Technology (Betar coil), Twisted Sage (Tensor Ring) and Amazon.com (project box and electronic components). Websites are provided for all major components. The Kindle version of this book was professionally created by CreateSpace/Amazon and is available under Book Match and Kindle Unlimited for free. There is no DRM.

This is the third edition of the book. The second edition is still available as a Kindle book. The second edition is 43 pages while the third edition is 268 pages. Everything in the second edition is included in the third edition. Please note that the b&w version of the third edition is \$14.00 while the color is \$39.99. The Kindle version is \$6.99 and is available under Book Match and Kindle Unlimited for free. The Universe is awash in psychic power. Some of the names for this ability used in the past are Miracles, Blessings and Magic. It is natural and normal. Everyone and everything exists soaked in this power and everyone and everything has this natural ability. Normal people have this ability. People with above normal ability we call psychics. There is no difference except in the level of ability. Radionics amplifies and converts this ability, for everyone, into a simple to follow procedure. That is why the subtitle of this book is, "Miracles in the palms of your hands". This book is intended as a starting point for new Radionics students. It does not explain what, it explains how. It is a spiritual based book. If you don't know what Radionics does then this book is not for you. If you know what it does and just need to know how to do it, then this book will get you there. Certainly there are things in this book that exist nowhere else that will make it useful even to experienced operators. This book introduces the Radionics Operating System (ROS) and the Radionics Operating System Program (ROSP). The ROS is an easy way of performing radionics using Radionics programs stored in crystals. ROSP is the operating system program that supports that way of thinking. This concept turns the training of Radionics on its head. Instead of learning how to use the system and then taking years to get good at obtaining results, the ROS and ROSP lets you get results at a grand master's level from day one. If you ever wanted to develop your abilities this is a safe way to do it. Warning: This course assumes you already own a 2-dial-per-bank style Radionics system, either symbolic or electronic. You can download symbolic Radionics systems for free and they are good enough to learn. A symbolic Radionics system is included in the printed version of this book which you can photocopy for use. The book includes access to a radionics support website for readers of the book. The website includes a pdf of the printouts required for the training exercises. This allows people to keep the book unmarked.

WHAT IS THE SECRET ART? The history of radionics is the story of how various inventors designed devices that employ directed intent to affect the real world. With these tools, they promoted healing without pills or surgery, grew crops without fertilizer, restrained insect predation without pesticides, and performed a host of other seemingly impossible feats that defy mechanistic science. THE SECRET ART traces this astonishing process beginning with early art designs suggestive of radionic intent. For many prehistoric and indigenous peoples, art was also a means of interacting with Nature to enhance healing, increase crop yields, and enable visionary experiences. Coincidentally, radionic inventors discovered by trial and error that even drawings and bizarre technology could function radionically. This discovery followed a long process of design innovation that started with mechanical devices, proceeded through a generation of electronic instruments, and most recently has been applied to computer and software technology. Conceivably, the theory and techniques outlined in this book could provide artists with a revolutionary approach to the creative process that is at once both new and timeless. A potential exists today for radionic ideas to empower creative individuals to develop skills in working with Nature that achieve profound real world results.

This book explores the interface that exists between the human energy field and the Universal Field of energy in which we live. It shows how these fields can be utilised for distant diagnosis and treatment. It also illustrates that the surest and most effective way to ameliorate a defect in any biological system, is to modulate the interacting and interdependent energy fields by way of the chakras. The same energy fields can be used to take photographs of distant objects, particularly the energy structures of living human tissues and pathological states existing in them. The vibratory patterns and potencies of homoeopathic remedies can also be drawn from the ether-fields and impregnated into neutral substances such as water or alcohol solutions which have a capacity for memory. Radionics is a healing art that links the physical world with the unseen worlds lying beyond the physical senses. Diagnostically it probes to the levels of causation of disease; therapeutically it is gentle and non-invasive.
