The total amount is the unknown quantity (x) that we need to find. Percent and the partial amount are given and are known quantities. Cross multiplying and solving for x, gives the value of the total amount. 
$$\frac{\text{percent}}{100} = \frac{\text{partial \: amount}}{\text{total \: amount (x)}}$$
 
$$\text{Total \: amount} = \frac{\text{partial \: amount}}{\text{percent}} \times 100$$
 Formula

Know the equation used to calculate the total amount you will pay. To find the total amount paid at the end of the number of years you pay back your loan for, you will have to multiply the principal amount borrowed with 1 plus the interest rate. Then, raise that sum to the power of the number of years. The equation looks like this:  $F = P(1 + i)^N$
