## TechRadar

Manual focus is best for this, as you have complete control of where you place of the focal point. Start at either the front of the image or the back, and move through the frame. You can leave out a distracting or unattractive background. After you have taken the images, you need to review them

to ensure a sharp focus throughout.

## **Why Use Manual Focus? | How to Manually Focus Your Camera**

The simplest way to manually focus your lens is just to adjust the focus ring until whatever you are trying to capture is sharp. Remember, the wider your aperture,

# Bookmark File PDF How To Use Manual Focus On Dslr

the more accurate you'll need to be , and when you're focusing through your lens like this, your aperture is always wide open, even if you have it set to something else; it only closes up when you go to take a shot.
