## Humax Germany | Satellit, Kabel, Terrestrisch receivers

Humax were a little bit more expensive than the other manufacturers but were by far the most reliable which is why I was happy to recommend them. The initial Humax Foxsat PVR was a standout product at the time and I still visit many properties where people are still using these despite the loss of BBC iPlayer and ITV Hub.

## Humax No Longer Manufacturing Freesat Boxes

The Manual of Dermatology was developed by Dr. Cafardi at the University of Alabama at Birmingham, Department of Dermatology, and covers broad dermatological topics necessary for any dermatology resident treating patients. Topics include alopecia, medication dosing and management pearls, fungal disorders, genodermatoses, differential diagnoses of various skin diseases, management of infections, surgical anatomy and tips, HIV dermatology, pediatric dermatology, and skin cancer management and terminology. The practicality of this book is unique and includes key clinical data for residents, making it essential as a reference for quick differential diagnoses, work-up tips, management, and treatment options. This quick reference offers a more practical approach to dermatology, with drug names and dosing, and more information on mycology/onychomycosis than any other handbook on the market. The Manual of Dermatology is portable, comprehensive, easily accessible, and is based upon algorithms, tables, and pearls taught to dermatology medical students, making it a vital

resource in all university medical libraries across the country.

This book provides an introduction to digital storage for consumer electronics. It discusses the various types of digital storage, including emerging non-volatile solid-state storage technologies and their advantages and disadvantages. It discusses the best practices for selecting, integrating, and using storage devices for various applications. It explores the networking of devices into an overall organization that results in always-available home storage combined with digital storage in the cloud to create an infrastructure to support emerging consumer applications and the Internet of Things. It also looks at the role of digital storage devices in creating security and privacy in consumer products.

In *The End of Japanese Cinema* Alexander Zahlten moves film theory beyond the confines of film itself, attending to the emergence of new kinds of aesthetics, politics, temporalities, and understandings of film and media. He traces the evolution of a new media ecology through deep historical analyses of the Japanese film industry from the 1960s to the 2000s. Zahlten focuses on three popular industrial genres: Pink Film (independently distributed softcore pornographic films), Kadokawa (big-budget productions as part of a transmedia strategy), and V-Cinema (direct-to-video films). He examines the conditions of these films' production to demonstrate how the media industry itself becomes part of the politics of the media text and to highlight the complex negotiation between media and politics, culture, and identity in Japan. Zahlten points to a different history of film, one in which a once-powerful film industry transformed into becoming only one component within a complex media-mix ecology. In so doing, Zahlten opens new paths for uncovering similar broad processes in other large media societies. A Study of the Weatherhead East Asian Institute, Columbia University

In this monograph, the authors summarize their findings in complex neuroimaging work (cranio-, spondylo-, myelo- and angiography as well as CT and MR imaging of the brain and spine) during their longstanding experience at the N. Burdenko Neurosurgical Institute in Moscow. The book begins with a review of modern neuroimaging techniques: CT and MR angiography, perfusion and diffusion imaging, tractography, spectroscopy and functional MR imaging. The problems and various other aspects of diagnosis of intra- and extra-axial brain tumors (more than 30,000 verified cases) as well as of cerebrovascular, infectious, demyelinating, degenerative and traumatic brain and spine lesions are discussed. The volume is well illustrated with angiographic, CT and MR images of complex diagnostic studies. The numerous images represent a "visual text," which can be used as an atlas by practical clinicians. This book is a comprehensive reference manual for neurologists, neurotraumatologists and radiologists. It may also be of interest to technicians, medical physicists, students and other specialists interested in neurovisualization and diagnostic imaging.

This book contains 50 articles of Digital Headend Industry. Headend INFO's "First 50 Articles" is package of Digital Headend Industry. for more information this book visit <http://www.headendinfo.com/headend-info-books/>

Arrested by the Gestapo and deported to Dachau, Robert Antelme recovered his freedom a year later when François Mitterand, visiting the camp in an official capacity, recognized the dying Antelme and had him spirited to Paris. Antelme's story of his experiences in Germany--his only book--indelibly marked an entire generation, "a work written without hatred, a work of boundless compassion such as that is to be found only in the great Russians." Also available: On the Human Race: Essays and Commentary

This volume, new to The Receptors series, focuses on several areas, including the birth, maturation, and structure of Chemokines; Neutrophil, Dendritic, and Lymphocyte trafficking; and Chemokine Receptors in diseases such as AIDs and lung cancer. In particular the book contains cutting-edge information ranging from basic molecular and cellular mechanisms to physiological and pathological roles of chemokines.
