Hunter is proud to introduce two new kits designed to expand the capabilities of the Pro-C controller. The kits allow users to easily expand station counts and bring the power of two-wire technology to residential or small commercial projects. The PCM-1600-KIT enables control for up to 23 conventional stations. If users need to expand the system, they don ' t have to replace the

Irrigation, as the biggest water user in most regions of the world is facing significant challenges in balancing social, economic and environmental needs for water. These proceedings of the 5th International Conference on Sustainable Irrigation and Drainage: Management, Technologies and Policies provide examples of how irrigation and drainage can become more sustainable, while acknowledging that the concept of sustainability is a goal that continues to change as our knowledge of the biophysical realities alters. In that sense moving towards sustainability is an ever evolving journey. A focus is made on the implications for improving sustainability, whether this is drainage, irrigation technologies, economic modelling, governance studies for irrigation management,
