Cold reading can be loosely defined as 'how to talk to people so you sound psychic'. This is the definitive guide to how cold reading is used in the psychic industry. It systematically describes a wide range of techniques that enable those who give readings to make seemingly accurate statements to a complete stranger. These statements can refer to past, current or future events or to the client's personality, feelings and potential. This is primarily a descriptive book, not an instructional one. It's primary aim is to describe cold reading techniques rather than to teach anyone how to use them or how to give readings.

"How can you talk to a complete stranger as if you have known them all your life? Is it really possible to read someone's thoughts and feelings within seconds of meeting them? In this..book ... explains the secrets of the oldest and most powerful psychological persuasion system in the world"--Back cover.

More and more people every day are visiting psychics for advice, guidance and a peek into the future. The industry is a moneymaker, with TV talk shows, Internet astrologers and corner store psychics available for the seeker's pleasure. Mediums, sages and astrologers have enjoyed a long and well-documented history, and can even be found in The Bible, while modern psychics have turned their readings into fame, fortune and celebrity. But what can

a psychic really do? This book will examine the ways that psychics run their show. Readers will come to understand the basics of the "cold read," which is the psychic's main tool for convincing customers to return

The James Bond Cold Reading is a whole new take on the twelve lines of the 'Classic Reading' made so popular from the 50's to the present day. Julian 'Bev' Moore shows you how this much discussed but seldom used powerful cold reading technique can be applied effectively and memorised in no time at all using characters such as James Bond that you already know and love. Forget about learning stock lines and never using them - using the proven techniques in The James Bond Cold Reading, you can learn to speak in your own words and amaze people by how much you know about them using one of the most misunderstood tools of mentalism - the character reading. By bringing a modern slant to an old technique, Julian 'Bev' Moore proves once again that the old ones are the best - if only we knew how to apply them. If you're not a fan of 'stock lines' and think that learning them is a waste of time, this ebook could seriously change your mind! REVIEWS "I got Julian's book and it is wonderful! It is a great system for doing a reading and extremely practical. I applaud Julian and highly recommend this!" - Richard Osterlind "First palmistry, now general Forer-Barnum 101... this guy really amazes me." - Craig Browning "Julian has taken the Classic Reading - which isn't out of date, as some would suggest - and applied a James Bond theme to its LEARNING (not to the reading itself), to make the reading's customization so much easier. It's ingenious, simple, and thought-inspiring, all at the same time! Buy this now, and start using it right away!" - R. Lee Davis "I have tried many times to learn the stock lines of cold reading. I've tried memory techniques, linking, the peg system, and even with all that everything seemed a confusing, repetitive mess. Because of Julian's system, in two days, I have learned to give a cold reading forward, backward, inside out and in my own words. Just as with Julian's palmistry book saved me about five years of study, this book is just as good and also very interesting. If you're interested in cold reading at all this will be the best money you'll ever spend. As a side note his system could be applied to anything else you might want to memorize and make your own. I have never heard of his techniques before and I have studied a lot of memory techniques. It's so easy I will add this to my 'readings' repertoire." - Scott Martisse "So I'm finally watching the new Casino Royale and lines from the James Bond Reading keep popping unbidden into my head. What makes this interesting is I hadn't really intended on learning the reading via James Bond but via a character I know more about. I followed Julian's suggestions to practice readings aloud, even to inanimate objects. After a bit of this, I tried the real deal. This isn't something you can do mechanically, at least if you want to get maximum effect and responses. It is a matter of a give and take that is "entrancing" in its impact. I can't wait to see what more experience will bring. Thank you Julian, you really have made a significant contribution. Your ability to simplify and teach is exceptional. I generally rely on my knowledge as a psychologist to add a bit of reading but it wasn't anywhere as powerful as applying this system. Folks, don't just read JBR. Get out there and use it." - Dr Bill Cushman OTHER KINDLE BOOKS IN THE SPEED LEARNING SERIES BY JULIAN MOORE Speed Learning: Graphology - The Art Of Handwriting Analysis Speed Learning: Cartomancy - A Playing Card Reading Primer Speed Learning: Palmistry - Palm Readings In Your Own Words Speed Learning: Numerology - Numbers Past And Present With The Lo-Shu Square Speed Learning: Star Signs

Morgan Strebler's Ice Cold System is one of the only systems that has been designed from the ground up to work in the real world, with 10 years of experience and constant evolution, it is now ready to be released. Imagine using any Tarot Deck, Runes, Palm, or even regular playing cards (or no oracle at all) and being able to tell names and secrets that have happened to them, medications they take, sexual orientation, and exact problems when they were children, even certain gambling pleasures of theirs, and doing it completely cold! Nothing is ever written down or said, no actual mentalism or magic gimmicks techniques or subtleties are used. The Ice Cold System was made with one goal in mind, to go up to anyone anywhere anytime, or even over the phone, and be able to tell them secrets about themselves, using life events that they have never told anyone! With no fishing, no Barnum statements, and again no magic ploys used whatsoever.

Bestselling author Michael Shermer delves into the unknown, from heretical ideas about the boundaries of the universe to Star Trek's lessons about chance and time A scientist pretends to be a psychic for a day-and fools everyone. An athlete discovers that good-luck rituals and getting into "the zone" may, or may not, improve his performance. A historian decides to analyze the data to see who was truly responsible for the Bounty mutiny. A son explores the possibilities of alternative and experimental medicine for his cancer-ravaged mother. And a skeptic realizes that it is time to turn the skeptical lens onto science itself. In each of the fourteen essays in Science Friction, psychologist and science historian Michael Shermer explores the very personal barriers and biases that plague and propel science, especially when scientists push against the unknown. What do we know and what do we not know? How does science respond to controversy, attack, and uncertainty? When does theory become accepted fact? As always, Shermer delivers a thought-provoking, fascinating, and entertaining view of life in the scientific age.
