IEEE citation style is used primarily for electronics, engineering, telecommunications, computer science, and information technology reports. The three main parts of a reference are as follows: • Author ' s name listed as first initial of first name, then full last. • Title of article, patent, conference paper, etc., in quotation marks.

Generally, the draft follows the IEEE Standards Style Manual that sets guidelines for the clauses and format of the standards document. Balloting the Standard: Once a draft of the standard is finalized in the Working Group, the draft is submitted for Balloting approval. The IEEE Standards Department sends an invitation-to-ballot to any individual who has expressed an interest in the subject matter of the standard.

IEEE Standards Association - Wikipedia  
IEEE style is based on the Chicago Style. In IEEE style, citations are numbered, but citation numbers are included in the text in square brackets rather than as superscripts. All bibliographical information is exclusively included in the list of references at the end of the document, next to the respective citation number.

Searchable electronic version of print product with fully hyperlinked cross-references.

SECIII-Social, Ethical and Cognitive Issues of Informatics and ICT Welcome to the post-conference book of SECIII, the IFIP Open Conference on Social, Ethical and Cognitive Issues of Informatics and ICT (Information and Communication Technology) which took place from July 22-26, 2002 at the University of Dortmund, Germany, in co-operation with the German computer society (Gesellschaft flir Informatik). Unlike most international conferences, those organised within the IFIP education community are active events. This wasn't a dry academic conference - teachers, lecturers and curriculum experts, policy makers, researchers and manufacturers mingled and worked together to explore, reflect and discuss social, ethical and cognitive issues. The added value lies in what they, the participants, took away in new ideas for future research and practice, and in the new networks that were formed, both virtual and real. In addition to Keynote Addresses and Paper Presentations from international authors, there were Provocative Paper sessions, Case Studies, Focussed Debates and Creative Exchange sessions as well as professional Working Groups who debated particular themes. The Focussed Debate sessions helped to stimulate the sense of engagement among conference participants. A Market Place with follow-up Working Groups was a positive highlight and galvanised participants to produce interesting reports. These were presented to the conference on its last day. Cross-fertilisation between the papers generated some surprising and useful cross-referencing and a plethora of social, ethical and cognitive issues emerged in the discussions that followed the paper presentations.

Provides guidelines and examples for handling research, outlining, spelling, punctuation, formatting, and documentation.

The current, thoroughly revised and updated edition of this approved title, evaluates information sources in the field of technology. It provides the reader not only with information of primary and secondary sources, but also analyses the details of information from all the important technical fields, including environmental technology, biotechnology, aviation and defence, nanotechnology, industrial design, material science, security and health care in the workplace, as well as aspects of the fields of chemistry, electro technology and mechanical engineering. The sources of information presented also contain publications available in printed and electronic form, such as books, journals, electronic magazines, technical reports, dissertations, scientific reports, articles from conferences, meetings and symposiums, patents and patent information, technical standards, products, electronic full text services, abstract and indexing services, bibliographies, reviews, internet sources, reference works and publications of professional associations. Information Sources in Engineering is aimed at librarians and information scientists in technical fields as well as non-professional information specialists, who have to provide information about technical issues. Furthermore, this title is of great value to students and people with technical professions.

Ren é Weis is a freelance author and a professor of English at UCL. He has written on a wide variety of subjects, including Edith Thompson (of the infamous 'Thompson and Bywaters' murder case in the 1920s), the last Cathar insurgency in the Pyrenees in the Middle Ages, and a biography of Shakespeare. As a professional Shakespearian, he has published extensively on Shakespeare and Renaissance drama, his publications including editions of Romeo and Juliet, King Lear, Henry IV Part 2, and an Oxford World Classics edition of the works of John Webster. A lifelong lover of opera, he also contributes regular pieces to the programmes for Royal Opera House productions.
