Plant layout is concerned with the spatial arrangement of processing equipment, storage vessels, and their interconnecting pipework. Deciding a good layout is an important activity in the design of chemical and process plants. A

Multipurpose Batch Plants ...

According to Keith
and Gubellini,

“Plant layout deals
with the
arrangement of the
physical facilities
and the manpower
which are required
to manufacture a
product or perform
a service.”

According to J.

Download Free Industrial

Lundy, “Plant layout ideally involves the allocation of space and the arrangement of equipment in such a manner that overall operations costs be minimised.”
